Historical Background

In their meeting of February 1980, the Seven Members Committee of Governors of Arab Central Banks and Monetary Authorities recommended that the Arab Monetary Fund be in charge of preparing a Joint Annual Report on economic developments in the Arab region, in cooperation with the General Secretariat of the Arab League and other Arab regional specialized institutions, in order to avoid duplicating the efforts made by each of them and to provide a unified source of data and information on the Arab economies. The Joint Arab Economic Report provides Arab Ministers of Economy and Finance, the governors of Central Banks, Monetary Authorities, and other interested stakeholders in Arab economic affairs, with information about recent developments in the economies of Arab countries to enable them to discuss key issues facing the Arab region, whether in terms of their relationships with each other or their relationships with other countries of the world.

The first edition of the Joint Arab Economic Report was issued in August 1980, as a result of fruitful cooperation with the Arab Fund for Economic and Social Development (AFESD). The General Secretariat of the League for the Arab States joined the cooperation effort starting from the 2nd edition of the Report, and the Organization of Arab Petroleum Exporting Countries (OAPEC) from the 3rd edition.

The four institutions participating in preparing the Report hope to have been successful in achieving the objective of describing the Arab economic situation, practically, objectively, and neutrally, within a concise framework that reflects the most important trends in Arab economies. This may provide useful material for decision makers and researchers interested in the economic affairs and development of the Arab region. The participating institutions also hope that such analytical efforts be enhanced continuously, benefiting from comments and suggestions by various stakeholders. To this end, they hope the Report becomes the main reference to follow up developments in Arab economies and to assist in the economic policy-making that promotes development and stability in the Arab region at large and supports joint Arab action and cooperation.

Countries (OAPEC)

Preface

The 39th edition of the Joint Arab Economic Report 2019 (JAER), as is the case since its first edition published in 1980, addresses economic developments in the Arab economies.

The report is the result of fruitful cooperation among Arab institutions. It is co-authored by the General Secretariat of the League of Arab States, the Arab Fund for Economic and Social Development, the Arab Monetary Fund and the Organization of Arab Petroleum Exporting Countries. Each of these four institutions prepares their respective chapters annually, in line with the agreed upon concept note. In addition, the Arab Monetary Fund has held editing and publishing responsibilities since 1980.

A draft Report is submitted, for limited circulation, to enable member states to provide comments and feedback, during the annual September meeting of the Governors of Arab Central Banks and Monetary Authorities, as well as to the September meeting of the Economic and Social Council of Ministers. Considering such comments and suggestions, the Arab Monetary Fund, in coordination with the other participating institutions, edits the final draft and publishes the Report before the year's end.

The participating institutions endeavor to ensure that the Report reflects objectively the current situations of Arab economies, drawing on the most recently available data and information, as well as on an established methodology in the preparation of the Report.

The JAER authors collect the required data and information from reliable national sources and make necessary estimations for the missing data, in order to submit the report on time. The Arab official statistical authorities have responded periodically by completing the Report Questionnaire. We hope this positive stance will continue to enable the Report authors to provide an overall view of the Arab economies.

In terms of the Report methodology and its development, the participating institutions ensure that the individual Chapters provide the analysis of Arab economic conditions using key indicators, after a thematic classification of the Arab countries to facilitate comparative analysis. To this end, the figures are calculated using the US dollar at the exchange rates provided by the member country for the Report's purposes.

Finally, each year the JAER includes a special thematic Chapter, that deals with a major economic issue, and the contents of the other Chapters should reflect this issue, as far as possible.

We hope that this issue of the JAER will, like the previous editions, serve as a useful reference for decision-makers and economic analysts as well as researchers.

Basic Indicators for Arab Countries In 2018

Area

Total Area	13.2	(Million Km ²)
Arab Region Area to World Area	9.6	Percent

Population and Work Force

Total Arab Population	415.0	(Million)
Ratio of total Arab Population to World Population	5.44	(Percent)
Arab Total Work Force	131.0	(Million)
Unemployment Rate*	10.0	(Percent)

Gross Domestic Product

GDP Value at Current Prices	2682.6	(Billion USD)
Annual Growth Rate (at current prices)	7.8	(Percent)
Annual Growth Rate (at constant prices)	2.6	(Percent)
GDP Per Capita (at current prices)	6651	(USD)
Agriculture Value Added to GDP	4.5	(Percent)
Value of Food Gap	33.6	(Billion USD)
Extractive Industries Value Added to GDP	26.8	(Percent)
Manufacturing Industries Value Added to GDP	10.4	(Percent)
Services Value Added to GDP	48.3	(Percent)

Oil & Natural Gas

Arab Oil Reserves to World Reserves	48.6	(Percent)
Arab Natural Gas Reserves to World Reserves	27.0	(Percent)
Arab Crude Oil Production	25.3	(Million barrels per day)
Arab Crude Oil Production to World Production	28.7	(Percent)
Arab Marketed Natural Gas Production to World Production	15.5	(Percent)
Oil exports revenues (estimated at current prices)	438.1	(Billion USD)

Trade

Arab Merchandise Exports (fob)	1095.4	(Billion USD)
Arab Merchandise Exports to World Exports	5.7	(Percent)
Arab Merchandise Imports (cif)	824.6	(Billion USD)
Arab Merchandise Imports to World Imports	4.2	(Percent)
Value of Intra-Arab Exports	108.7	(Billion USD)
Intra-Arab Exports to Total Arab Exports	9.9	(Percent)

External Official Reserves

Official Reserves Assets**	1030.8	(Billion USD)
Import Coverage	16.4	(Month)

External Public Debt of Arab Borrowing Countries

External Public Debt	290.1	(Billion USD)
Value of External Public Debt Service	21.6	(Billion USD)
External Public Debt to GDP	35.5	(Percent)
External Public Debt Service to Exports	9.7	(Percent)

The Joint Arab Economic Report 2019

Overview

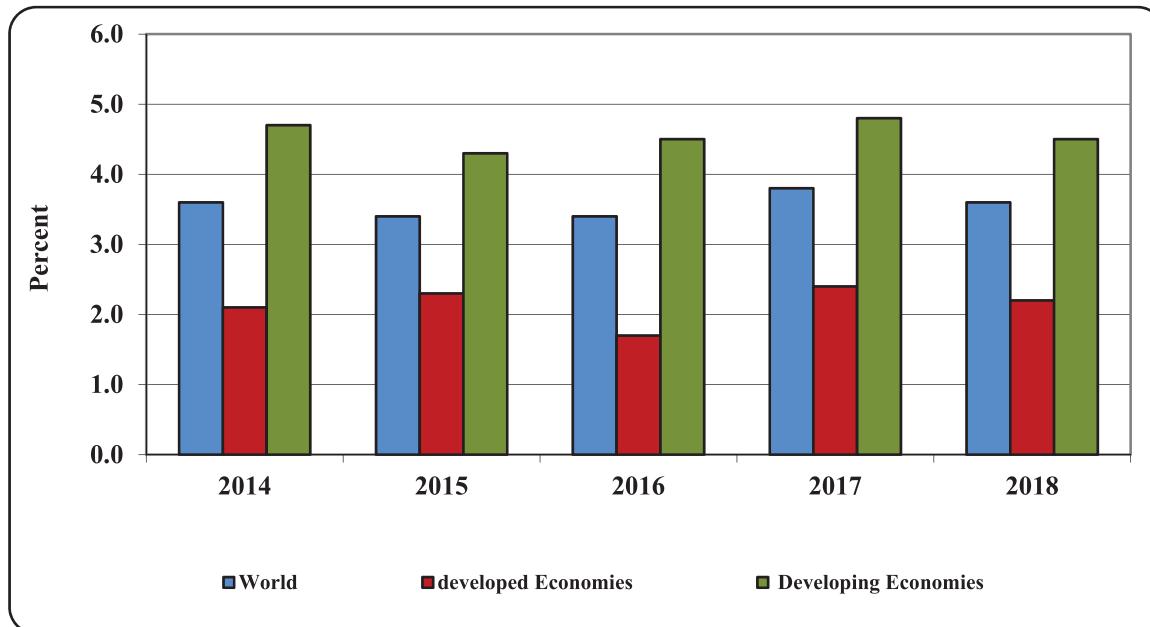

The Joint Arab Economic Report 2019 presents an overview of economic developments that took place in the Arab countries during 2018. It begins with a summary review of the performance of the global economy in Chapter 1, followed by economic and social developments in Arab countries in Chapter 2. Chapters 3 and 4 respectively review developments in the agricultural and the industrial sectors in Arab countries, while Chapter 5 deals with developments in the oil and energy sectors. Chapter 6 reviews public finance developments, while Chapter 7 addresses developments in monetary policy, banking, and capital markets. Chapter 8 outlines developments in international and intra-regional trade and Chapter 9 describes developments in the balance of payments, external public debt, and exchange rates in Arab countries. Chapter 10, the thematic chapter of the report addressed this year the issue of “Financial Inclusion in Arab Countries: The Reality and Prospects”. Chapter 11 sheds light on “Arab Development Assistance”, while Chapter 12 focuses on “Inter-Arab Cooperation in the liberalization of Trade in Services”. Chapter 13 highlights major developments in the Palestinian economy in 2018. Finally, the tables relevant to each chapter are annexed.

(Chapter 1)

Global Economic Performance

The global economy has continued to recover in the first half of 2018 amid the improvement in global industrial and commercial activities. However, the recovery has slowed down in the second half of 2018 due to the uncertainty resulted from trade tension between the United States of America and China. Moreover, the normalization of monetary policy in some major economies in 2018 contributed to the slowdown of the global economy in 2018. Accordingly, the **Growth Rate of the Global Economy** decreased to 3.6 percent in 2018 compared to 3.8 percent in 2017, Annex (1/1) & Figure (1.1).

Figure 1.1
Real GDP Growth Rate of World, Developed and Developing Economies
(2014-2018)

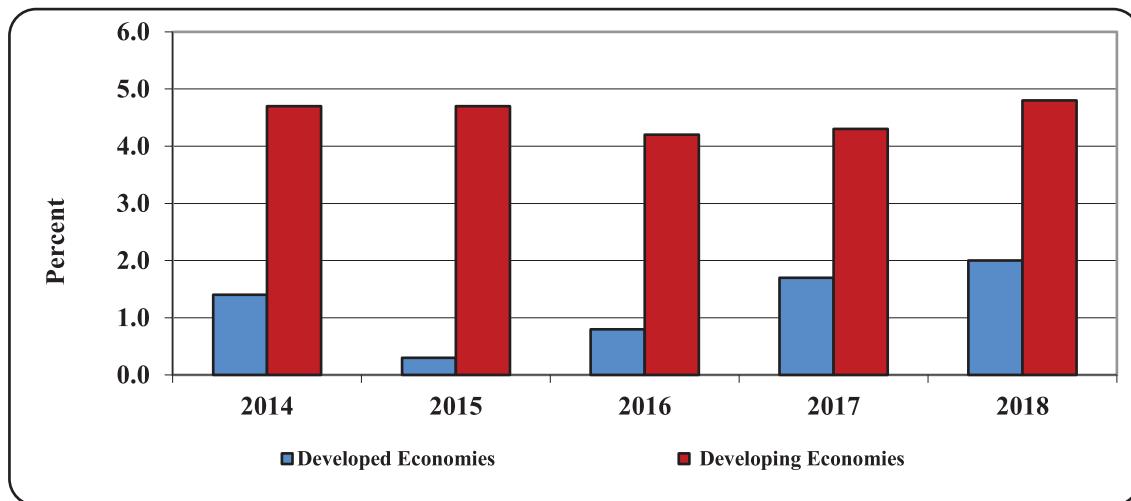

Source: Annex (1/1).

The growth rate of developed economies declined to about 2.2 percent in 2018 from 2.4 percent in 2017, while some developing countries and emerging market economies achieved a higher growth rate of 4.5 percent in 2018 compared to 4.8 percent recorded in 2017.

Despite the world economy slowdown, the **Global Inflation** rate increased due to several factors led to an increase in the inflationary pressures in a number of developed and developing countries, the most important of which were the high prices of oil and raw materials, and the devaluation of the currencies of some developing countries, Annex (1/2) & Figure (1.2).

Figure 1.2
Inflation in Developed & Developing Countries
(2014-2018)

Source: Annex (1/2).

On the other hand, the growth rates of **International Trade** declined to 3.8 percent in 2018 compared to 5.4 percent in 2017 amid uncertainty about trade policies and their adverse effects on investment, manufacturing, business climate, and investor confidence.

On **External Indebtedness**, international developments have contributed to the increase of the total external public debt in developing countries and emerging market economies, thus reaching USD 10057.9 billion in 2018 compared to USD 9607.4 billion in 2017. As for the **Exchange Rates of Major Currencies**, they have been impacted by several developments during 2018, leading to the depreciation of the US dollar against some other major currencies. The exchange rate of the US Dollar fell against the pound sterling and the euro, while it stood steady against the Japanese yen.

(Chapter 2)

Economic and Social Developments in the Arab Countries

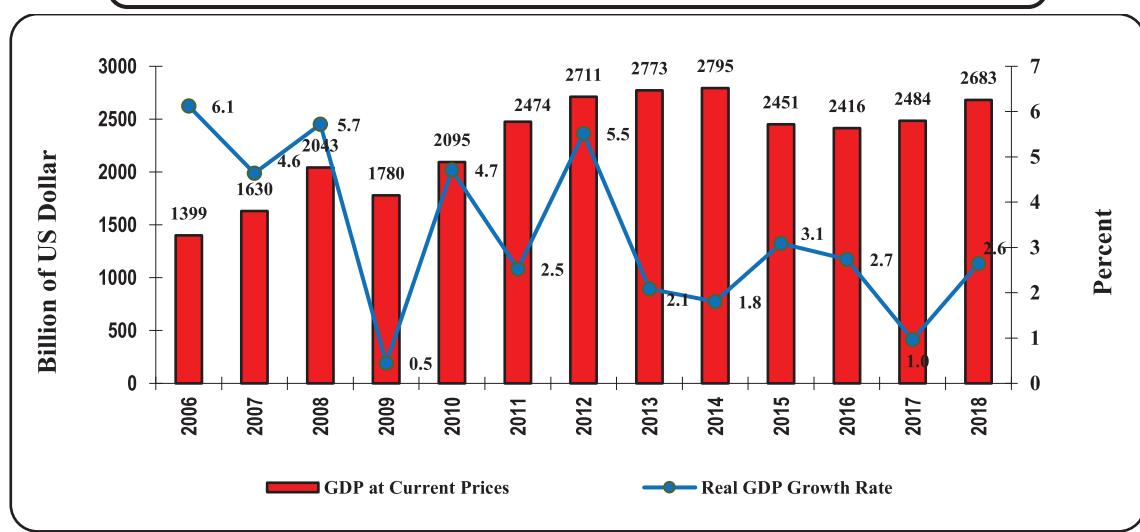

Macroeconomic Developments

The performance of the Arab economies as a group improved significantly in 2018 as the growth pace has increased in more than half of these countries which benefited from generally favorable external and internal conditions. The relative recovery of the global economy during the first half of 2018 increased the global demand for oil and non-oil Arab exports, which stimulate economic activities in those countries. On the other hand,

the performance of the Arab economies was adversely affected in the second half of the same year, due to a setback in the performance of the global economy in the aftermath of trade war, and the higher level of uncertainty in international financial markets after the rise in interest rates and the normalization of monetary policy in some advanced economies, especially in the United States of America. These developments have further complicated the debt situation in a number of Arab countries, thus affecting foreign investment and capital flows as a result of the increased attractiveness of dollar-denominated assets.

Despite the continued repercussions resulting from the internal situation in some Arab countries, higher growth rates are recorded in some other Arab countries in 2018 compared to 2017, thanks to improved oil export revenues, the positive effects of the implementation of economic reform programs, and to the adoption of more prudent fiscal policies. Accordingly, the **GDP at Current Prices** of the Arab countries as a group grew by about 8 percent in 2018 compared to 2.8 percent in 2017, Annex (2/1) & Figure (2.1).

Figure 2.1
GDP at Current Prices & Real GDP Growth Rate in Arab Countries
(2006-2018)

Source: Annex (2/1), estimates by the authors of the report, based on national and other international sources, estimates of country GDP levels in domestic currency in constant prices, aggregated after unifying base year, and converted to estimates in USD at the exchange rates of domestic currencies in the base year 2010.

The average **GDP Per Capita at Current Prices** in the Arab countries as a group was estimated at USD 6,651 in 2018, an increase of about 5.6 percent compared to 2017. The year 2018 witnessed more inflationary pressures in a number of Arab countries due to several factors, including the rise in domestic demand and in the prices of fuel and some other commodities following the implementation of fiscal policy reform programs. In

addition, some of these countries were affected by internal circumstances that led to inflationary pressures. However, these pressures eased up in the rest of the Arab countries. Accordingly, the **Inflation Rate** in the Arab countries as a group fell from about 8.1 percent in 2017 to about 7.9 percent in 2018.

The **GDP Growth Rate at Constant Prices** in the Arab countries as a group reached around 2.6 percent in 2018, compared to a growth rate of about 1.0 percent in 2017. Arab oil-exporters recorded a growth rate of about 2.5 percent in 2018, compared to 0.2 percent in 2017, while the Gulf Cooperation Council countries achieved a growth of about 2.3 percent in 2018, against a decline of about 0.3 percent in their GDP in 2017. The growth rate of other Arab countries rose to about 2.9 percent in 2018 compared to 2.8 percent in 2017.

As for the **GDP Sectoral Structure**, commodity production sectors recorded an increase in their share of output at the expense of services sectors, especially the extractive industries sector, in which its share of output increased from 22 percent in 2017 to about 26.8 percent in 2018, due to the high growth recorded by this sector estimated at around 31.9 percent in that year. In terms of the **GDP Distribution by Expenditure Items**, the share of consumption, and investment in the total GDP decreased in 2018 while the share of the resource gap has risen due to the increase in the share of exports of goods and services driven by a growth rate of about 16.6 percent in 2018.

As for **Poverty Indicators**, the latest available data show that poverty rates, according to national poverty lines, range between 4.8 percent in Morocco and 48.6 percent in Yemen. Poverty affects more than 40 percent of the population in Comoros, Sudan, Somalia, and Yemen. Considering Multidimensional Poverty Index (MPI), which focuses on three dimensions of individual deprivation in three essential elements of human life namely education, health, and standards of living, data reveal that while the standard of living contributes to the value of MPI for the low-income countries, health and education dimensions contribute more to the value of the index for the rest of Arab countries.

The spread of multidimensional poverty in the Arab countries resulted from a modest level of social services such as health, education, and housing, as well as the persistence of harsh conditions in some of these countries and to the increasing number of refugees and displaced persons that have fled their countries of origin. Disparities in terms of income distribution and expenditure are deemed low in the Arab countries compared to the rest of the world, where the Gini coefficient ranges between 27.6 in Algeria and 45 in Comoros. Yet, the ratio of the richest to the poorest 20 percent of the population is considered high. It is 10 folds in Djibouti and Comoros, while it ranges between 5 and 10

in the rest of the Arab countries, except for Egypt, Iraq, and Algeria, where the ratio is 5 times.

Social developments

The Arab countries have progressed in the areas of **Combating Poverty, Ensuring Universal Education and Health Care, and Empowering Women** during the period (2008-2018). This is evidenced by the positive developments of a number of social indicators, including adult and youth literacy rates, enrollment rates at different levels of education, high participation of women in the labor market, life expectancy at birth, and proportion of the population with access to safe drinking water and appropriate sanitation.

This progress is the culmination of broadening the scope of social services beneficiaries in Arab countries since the 1970s. However, despite the positive developments in a number of social indicators in the Arab countries, the majority of those countries still face major challenges such as the high rates of population growth, the need to reform education and increase its capacity as well as to improve its quality to meet the growing demand in all Arab countries, especially in the least developed ones, in addition to the high levels of unemployment, particularly among the youth, women, and educated population.

The average **Human Development Index** (HDI) for Arab countries, according to the Human Development Index released by the United Nations Development Program for 2017, was about 0.699 (medium human development: 0.645), which is slightly higher than the level registered in developing countries of 0.681, but well below the OECD Countries index which stands at 0.895⁽¹⁾.

(Chapter 3)

Sectoral Developments

Agriculture and Water

Agriculture is an important economic sector in most Arab countries in terms of meeting food consumption needs, absorbing a large workforce, and contributing to the GDP. It also provides commodities and raw materials used as inputs for many manufacturing and food industries.

Arab Agricultural Output at Current Prices dropped to about USD 119.9 billion in 2018, which represents a decrease of about 12.5 percent compared to the level registered

¹ UNDP, (2018). "Human Development Report".

in 2017. Much of this decline is due to the depreciation of national currencies against the dollar in a number of Arab countries with significant agricultural resources (Sudan, Egypt, Tunisia, and Syria). In Sudan, for example, in which agricultural output in 2018 accounted for 5.5 percent of the Arab agricultural output, the national currency depreciated by about 394 percent against the dollar. The growth rate of agricultural output in other Arab countries with agricultural resources such as Egypt, Algeria, Tunisia, Syria, and Morocco, which contribute to about 61.9 percent of the total Arab agricultural output, ranged between 4.2 percent in Syria and 28.2 percent in Egypt.

The **Contribution of the Agricultural Sector to the GDP** decreased to about 4.5 percent in 2018, against 5.5 percent in 2017. Similarly, **Per Capita Agricultural Output** declined by 17.3 percent, reaching USD 302 in 2018 compared to USD 366 in 2017, whereas the **Agricultural Output Per Agricultural Worker** in 2017 stood at around USD 6,167.

The actual **Cultivated Land** in 2017 represented about 32.8 percent of the 220 million hectares of arable land in Arab countries, while 40 percent of the land allocated to seasonal crops is rain-fed. The volume of water available annually is estimated at 258 billion m³, of which 209 billion m³ is surface water, and 49 billion m³ is groundwater and desalinated water.

Moreover, the **Agriculture Workforce** has been decreasing annually, dropping from about 27.1 million in 2010 to about 24.1 million workers in 2017, thus representing a yearly decline of 1.7 percent. This is due to the migration of agricultural labor to other sectors due to the lack of lucrative job opportunities in agriculture.

Plant production grew by 3.2 percent in 2018, owing to improved yields of some rain-fed crop varieties, primarily cereals, as well as favorable weather conditions. On the other hand, livestock production grew by 3.6 percent, while fish production increased by 3.7 percent reaching around 5.4 million tons, which represents about 67 percent of the fish stock volume.

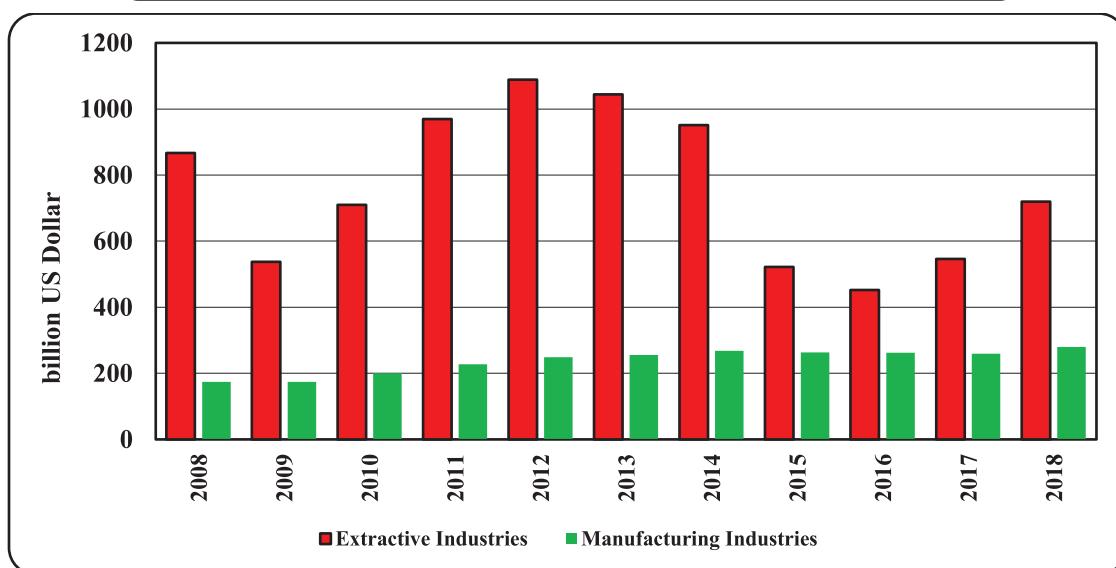

In terms of **Agricultural Foreign Trade**, the deficit in the Arab agricultural trade balance in 2017 amounted to about USD 62.4 billion, an increase of 0.5 percent from the previous year. Food deficit persisted in some food commodities, reaching total of USD 33.6 billion in 2017. Similarly, the self-sufficiency ratio for a number of staple food commodities is still low, mainly oils, fats, cereals, pulses, and sugar.

(Chapter 4)

Industry

The industrial sector has maintained its pivotal role in the Arab economy, thanks to the high growth rate of the extractive industries sector, reflecting the remarkable improvement in international oil prices. **The Industrial Output** in Arab countries grew by about 24 percent, rising from USD 805 billion in 2017 to almost USD 999.6 billion in 2018. It also contributed to about 37.2 percent of the GDP in 2018, with 26.8 percent for extractive industries and 10.4 percent for manufacturing industries, Annexes (4/1), (4/2) and figure (4.1).

Figure: 4.1
Extractive and Manufacturing Industries Value Added in Arab Countries
(2008-2018)

Source: Annexes (4/1) and (4/2).

Extractive industries have become one of the main economic drivers in many Arab countries. The importance of the extractive industry lies in the ratio of the Arab oil and natural gas reserves to the total global reserves, thus amounting to about 48.6 percent for oil and 27.0 percent for natural gas in 2018. The industry also contributes to the supply of domestic and foreign markets with fuel at an estimated 25.3 million barrels of oil per day in 2018 and about 600 billion cubic meters of marketed natural gas annually in 2018. The major role of the extractive industry is influenced by the fact that it is an industry of non-renewable depleting resources.

On the other hand, **manufacturing industries** in the Arab countries contribute to the acceleration of development, job creation, and resource development. In fact, manufacturing industries contributed to about 10.4 percent of the GDP in 2018. It provided as well about 26.7 percent of direct employment.

The manufacturing industries witnessed a steady growth. The Arab production of cement amounting to 252.8 million tons in 2018, and steel iron to almost 22.7 million tons, while the output of the building and construction sector reached about 6.5 percent of GDP. The Arab countries produced as well about 708.5 thousand tons of olive oil in 2018 and 3.6 million tons of sugar in 2017. The production of the automobile industry reached almost 546 thousand cars in 2018. The output of the oil refining industries amounted to about 9.1 million barrels per day in 2018.

Moreover, the report highlighted the importance of the Arab petrochemical and ethylene industries, which gained much importance in terms of production and export. Chapter four includes a dedicated section on the Arab integration efforts aiming at strengthening the industrial sector and concludes with some insights about the competitiveness of Arab manufacturing industries in the foreign markets.

(Chapter 5)

Oil and Energy

Global Oil Markets witnessed sharp fluctuations in 2018, particularly during the last quarter. It witnessed a recovery in the first quarter, in conjunction with the decision to extend the joint production cut agreement reached by OPEC countries with some oil producers outside “OPEC” until the end of 2018 on the one hand, and a reflection of the rise in global demand for oil thanks to the improved performance of the global economy, which began in the previous year (2017). This recovery continued during the second quarter of the year, which saw an amendment to the production cut agreement, on the back of growing concerns about the shortage of global oil supplies.

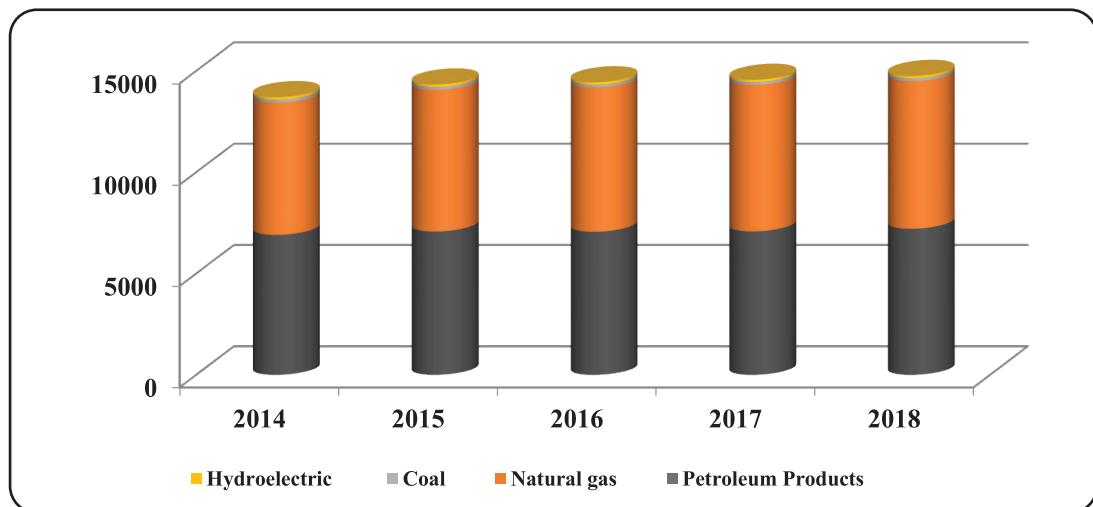

During the third quarter, oil markets have been relatively affected by the rising geopolitical tensions as well as tensions over trade between the US and China. While the fourth quarter witnessed increasing expectations of a decline in the growth rate of global demand for oil, and renewed concerns about the rise of global oil supplies, and this has resulted in new amendments to the agreement to cut production between “OPEC” to maintain the balance of oil markets. This coincided with the uncertainties related to the prospects for global economic growth, which could have a negative impact on global oil markets during 2019.

Overall, **Global Oil Prices** rose significantly, the average annual rate of OPEC crude basket price reached USD 69.8/barrel in 2018, thus registering the highest level since 2014. This was due to several intertwined factors, including those related to market fundamentals and other geopolitical factors, as well as speculations, and the volatility of the dollar during the year.

International Oil Demand also grew by about 1.5 million barrels per day in 2018, compared to 1.9 million barrels per day in 2017, bringing the level to 98.8 million barrels/day in 2018. Supplies availability remained significant, especially from the United States of America, in particular from shale oil, with the world total oil supplies rose by 2.4 million barrels/day, so as to reach 98.8 million barrels/day. The **OPEC Supply of Crude and Unconventional Oil** stabilized as well at the same level registered the previous year, with 38.7 million barrels/day. In contrast, **Supplies from Non-OPEC Producing Countries** rose by around 2.4 million barrels/day, reaching 60.1 million barrels/day, which contributed to an increase in global oil stocks. A slight increase was also observed in proven global oil and natural gas reserves in 2018, of 0.7 percent and 1.9 percent, respectively.

In terms of **Exploration Activities**, seven oil discoveries and six gas discoveries were achieved in the Arab countries during 2018, accounting for more than 48.6 percent of the estimated global oil reserves and about 27 percent of global natural gas reserves. Moreover, the Arab countries accounted for 29.2 percent of total world crude oil production while their share of marketed natural gas stood at around about 15.5 percent of the world total. Energy consumption in the Arab countries increased as well in 2018 by 188,000 barrels of oil equivalent per day (BOE/D), or 1.3 percent, thus reaching 14.7 million BOE/D. Moreover, oil and natural gas remained the main sources of energy needs in Arab countries, knowing that their shares combined accounted for 98.3 percent of total sources, with renewable energies significantly entering the fuel mix used for power generation, Annex (5/10) & figure (5.1).

Figure 5.1
Demand for Energy in Arab Countries
(Million barrels of oil equivalent/day)
(2014-2018)

Source: OAPEC, Secretary General Report, 2017.

Annual average prices of the main export crudes in Arab countries witnessed an increase in 2018 at different percentages ranging between 30.8 and 35.9 percent, which led to a noticeable increase in the value of oil exports in the Arab countries.

(Chapter 6)

Public Finance

The positive developments in the global oil markets, in terms of the steady upward trend in oil prices, contributed to strengthening the public finance in the Arab oil-exporting countries, which witnessed significant increases in oil revenues in 2018. Arab oil-exporting countries paid particular attention to developing tax collection, as part of their efforts to diversify public revenues apart from oil. In this context, some Arab countries finalized their legislative and regulatory frameworks related to strengthening the tax systems and introducing new taxes, such as the value-added tax, which led to an increase of tax revenues and to a consolidation of their fiscal position in some Arab countries during 2018.

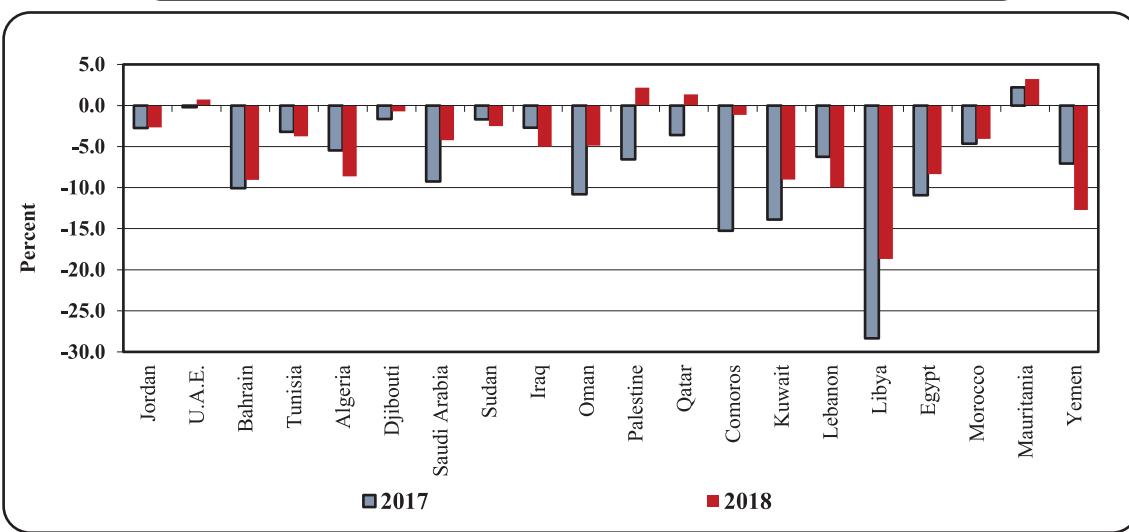

The resurgence of economic recovery in diversified Arab countries, albeit at a slow pace, and the tax reforms that have been implemented in those countries, played a major role in increasing tax revenues. Developments in public spending also reflect a trend followed by most Arab countries over the past several years to contain public spending to ensure

fiscal sustainability and enhanced the public budget position in the medium and long terms. Most of the Arab countries recorded limited growth in the level of public expenditure during 2018, taking into account the available fiscal resources as well as inflation factors, and requirements to meet development and social needs.

On the other hand, the unfavorable internal conditions prevailing in a number of Arab countries had an adverse impact on the state of public budgets in light of the economic and financial requirements arising from the decline in investments and various economic activities. In view of the above, total **Public Revenues and grants** in the Arab countries combined increased by about 19.0 percent, thus reaching almost USD 786 billion in 2018, which represents about 29.6 percent of the GDP of the Arab countries as a group during the same year. Total **Public Expenditure** increased as well in the Arab countries as a group by 8.6 percent and reached USD 899.7 billion, or 33.9 percent of the GDP.

As a result, the **Consolidated Budget Deficit** of Arab countries decreased to around USD 113.7 billion in 2018, compared to a deficit of about USD 168 billion in 2017. The deficit as a percentage of GDP also declined, from around 6.7 percent in 2017 to about 4.3 percent in 2018, Annex (6/10) & Figure (6.1).

Figure 6.1
Fiscal Overall/Surplus to GDP in Arab Countries
(2017-2018)

Source: Annex (6/10).

The total **Public Debt** (internal and external) in the Arab countries, for which data are available, increased by 6.3 percent, amounting to USD 707.8 billion in 2018, compared

to about USD 665.9 billion in 2017. The ratio of public debt to GDP for borrowing Arab countries rose to 128.7 percent in 2018, against 110 percent in 2017.

(Chapter 7)

Monetary, Banking and Capital Market Development

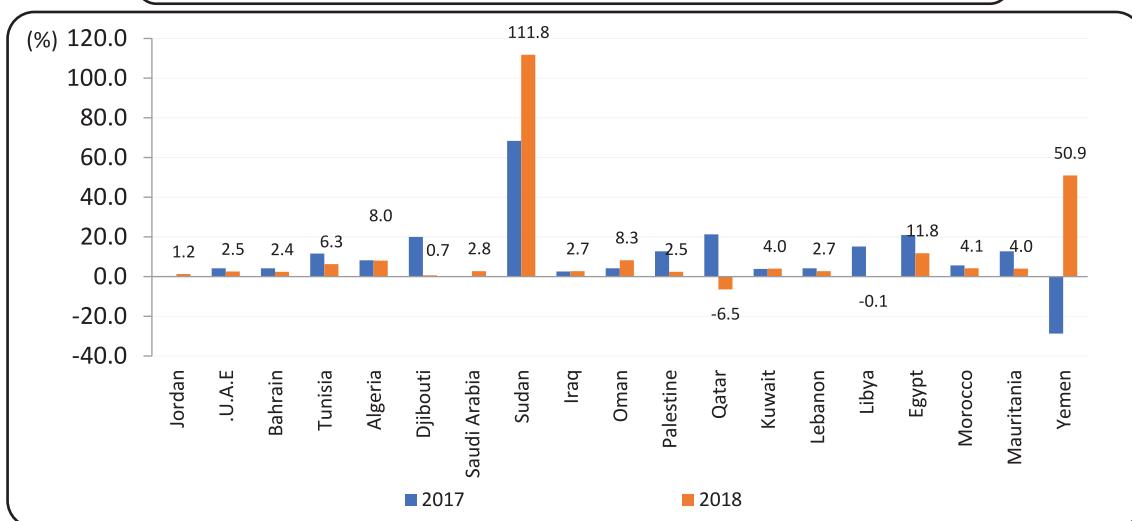

Domestic Liquidity in the Arab countries slowed down in 2018 due to some factors leading to a decline in net domestic and foreign assets. Therefore, the liquidity growth rate in the Arab countries decreased in 2018, reaching 6.0 percent compared to an 8.7 percent level registered in 2017.

With a large number of Arab countries pegged their currencies to the U.S. dollar and with the US Federal Reserve tended to raise the interest rate of the US Dollar four times during 2018, official interest rates have risen in Arab countries that implement fixed exchange rate regimes, particularly Arab oil-exporting countries, to maintain exchange rate stability. In contrast, the stance of monetary policy in some Arab oil-importing countries, which adopt more flexible exchange rate regimes, have varied, reflecting their need to contain inflationary pressures and support domestic currencies

On the other hand, some Arab central banks in the Arab oil-importing countries intensified their efforts to enhance exchange rate flexibility to absorb external shocks amid the success of the adopted economic reforms in fostering macroeconomic stability. These shifts in exchange rate regimes have enabled a number of Arab countries to move forward in implementing their policies aimed at targeting inflation, as some announced setting quantitative targets for inflation rates. In this context, the central banks in these countries continued to seek to establish frameworks for inflation expectations in the short and medium-term, so as to regularly monitor the price-related indicators as an intermediate objective of the monetary policy, and to use the interest rate in the money market as an operational objective of such monetary policy.

The monetary policy reforms adopted in the Arab countries in 2018 focused on increasing the efficiency of the monetary policy in achieving its targets, through the development of some existing monetary policy instruments, the introduction of new monetary instruments to ensure better liquidity management and increase the efficiency of monetary policy operational frameworks. Central banks interventions also focused on enabling the banking sector to meet the challenges associated with limited foreign currency resources, as well as on supporting economic growth, increasing levels of financial inclusion and harnessing modern financial technologies to increase the efficiency of financial services, Annex (1/7) & Figure (7.1).

Figure 7.1
Domestic Liquidity Growth Rate in Arab Countries
(2017-2018)

Source: Annex 1/7.

*Data for Saudi Arabia is for M3.

The performance of the **Banking Sector** improved in 2018 compared to the previous year. In fact, the aggregate data of the Arab banks showed improvements in the total assets, deposits, loans and credit facilities, and dollar-denominated capital bases. Banks' capital adequacy ratios have also maintained relatively high levels in most Arab countries in 2018, compared to the 10.5 percent minimum according to the Basel III requirements.

As for the performance of the Arab **Financial Markets**, it was generally positive during 2018 compared to 2017. Indeed, the market value of Arab stock exchanges listed in the database of the Arab Monetary Fund index rose by about USD 69.6 billion. However, trading value continued to decline for the fourth consecutive year, thus registering a drop of 3.5 percent. In terms of foreign investment in Arab stock exchanges, the value of foreign investors transactions increased compared to 2017, with such transactions recording a net positive flow compared to a net negative flow last year. In 2018, the supervisory authorities in the Arab countries continued their efforts to advance and develop the legislative and regulatory structure of the banking and non-banking sector, by keeping abreast of developments and adhering to the international standards and principles, and by striving to upgrade and update instructions and practices consistent with these standards and with enhanced disclosure and transparency.

(Chapter 8)

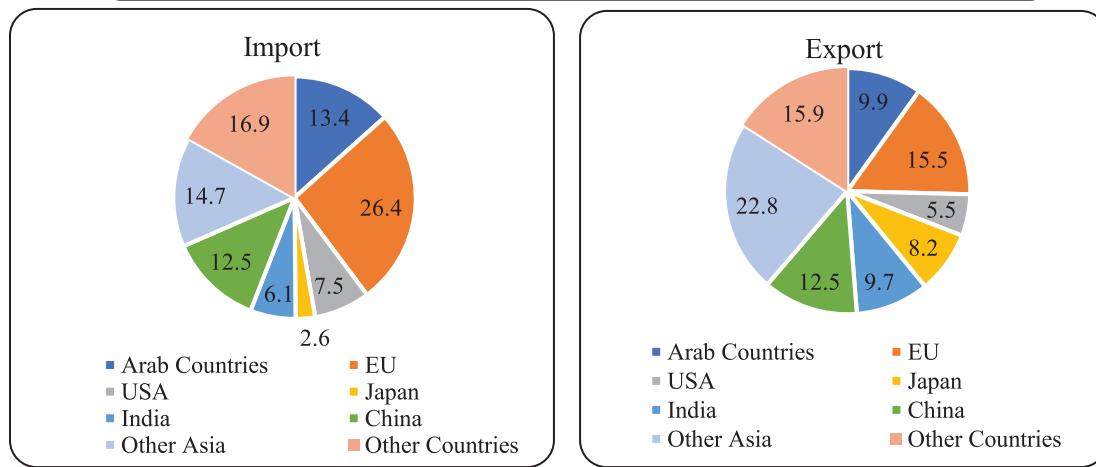

International and Intra-Regional Trade

The total **Arab Foreign Trade** amounted to USD 1,920 billion in 2018 against USD 1765 billion in 2017, thus increasing by 8.8 percent reflecting the increase of the total commodity exports to USD 1,095.4 billion in 2018 compared to USD 956.3 billion in 2017, an increase of about 14.5 percent compared to 2017. On the other hand, the Arab commodity imports rose slightly in 2018, thus reaching USD 824.6 billion compared to about USD 808.8 billion in 2017, which represents an increase of 1.9 percent.

With regards to the **Direction of Arab Commodity Trade** during 2018, data showed a rise in the volume of Arab exports destined to various trading partners. Indeed, inter-Arab exports accounted for 9.9 percent of the total Arab exports against 5.5 percent for the United States of America and 15.5 percent for the European Union. Asia is the main trading partner for the Arab countries, with a significant share reached 53.2 percent in 2018 while the rest of the world accounted for around 15.9 percent of the total Arab exports.

The Arab imports from major trading partners decreased by 2.0 percent in 2018, with imports from the United States dropping by 8.3 percent and from the European Union by 1.8 percent. In contrast, inter-Arab imports increased by 8.9 percent and from India by 32.6 percent, although imports from Asia declined by 24.9 percent, Annex (8/2) & Figure (8.1).

Figure 8.1
Direction of Arab commodity Trade (%)
(2018)

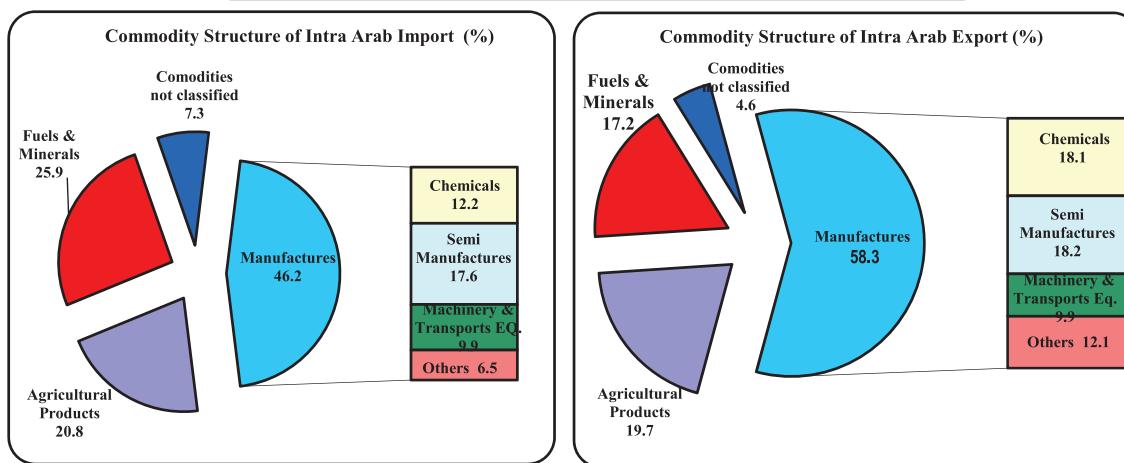

Source: Annex (8/2).

Regarding the **Commodity Structure of the Arab Foreign Trade**, fuel and minerals still account for the highest share in total Arab exports, reaching 63.4 percent in 2018 compared to 59.2 percent in 2017, with a decrease in the contribution of non-oil exports, despite efforts to diversify Arab economies. Manufactured products accounted for 28.8 percent, while agricultural commodities contributed about 7.1 percent of total exports. As for imports, data indicate that manufactured products account for the highest share of the total Arab imports at 65.1 percent, while agricultural commodities declined slightly, accounting for 18.8 percent of the total Arab imports during 2018.

The performance of **Intra-Regional Trade** continued to improve in 2018, thus reflecting the steady increase in the international oil prices for the second consecutive year and better internal conditions prevailing in some countries. As a result of these developments, the value of intra-regional trade increased in 2018 by an average of 6.2 percent, reaching about USD 109.6 billion, compared to almost USD 103.2 billion recorded in 2017, Annex (8/8) & Figure (8.2).

Figure 8.2: Commodity Structure of Intra- Arab Trade (2018)

Source: Annex (8/8).

In terms of the **Commodity Structure of Intra-Regional Exports**, crude oil contributed to around 6.0 percent of the intra-regional trade value in 2018. Regarding the non-oil intra-regional trade, the industrial commodities accounted for the largest share, followed by agricultural commodities.

In terms of **Trade in Services**, the year 2018 witnessed an increase in the deficit of the net services trade balance for Arab countries as a group, as a result of an increase in services payments. Moreover, Services receipts for Arab countries rose by 5.4 percent in

2018, reaching about USD 212.9 billion compared to about USD 202 billion recorded in 2017. This is due to the steady improvement in travel receipts (tourism) in some Arab countries. Meanwhile, the value of service payments for Arab countries as a group increased by 4.9 percent amounting to about USD 327 billion in 2018 against almost USD 312.3 billion achieved in the previous year, due to higher payments in the transport, shipping and insurance sectors owing to an increase in the value of commodity imports for Arab countries as a group.

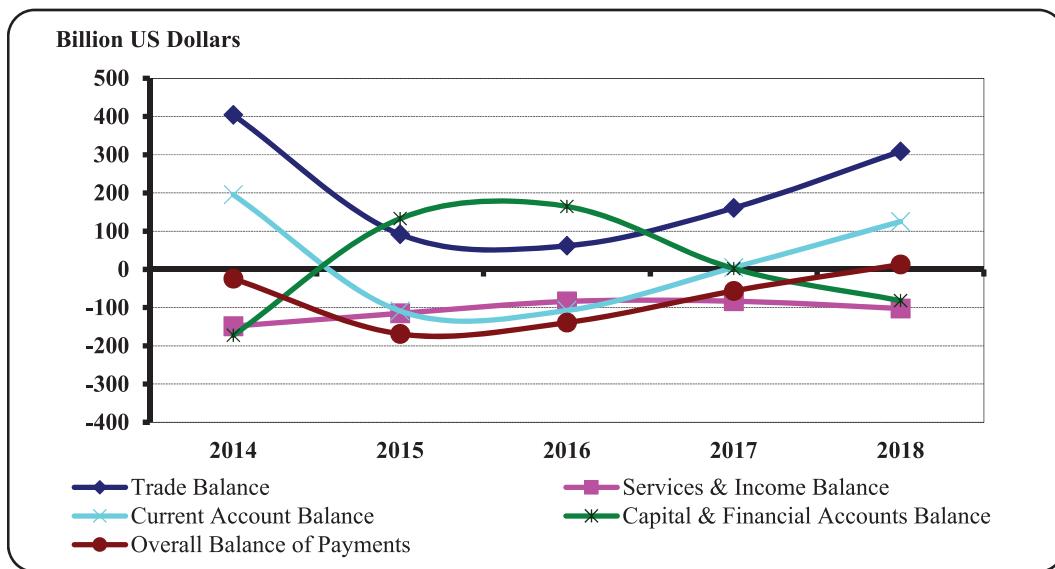

As a result of these developments, the deficit recorded in the services balance of the Arab countries as a group increased by 26.6 percent in 2018 to reach about \$114.5 billion compared to a deficit of about \$110.2 billion in the previous year.

(Chapter 9)

Balance of Payments, External Public Debt and Exchange Rates

The remarkable increase in international oil prices reflected positively on the performance of the Arab countries' balance of payments during 2018, which led to an increase in the **Trade Balance Surplus** of these countries by 98.1 percent, thus reaching about USD 318.4 billion. In contrast, the deficit recorded in the balance of services, income, and net transfers grew by 24.3 percent and 11.3 percent respectively, in 2018. As a result, the surplus of the **Current Account Balance** for Arab countries as a group in 2017 has increased to about USD 133.9 billion, equivalent to 5.0 percent of the GDP in 2018. Accordingly, the total **Deficit of the Balance of Payments** for Arab countries as a group recorded in 2017 of about USD 56.3 billion turned into a surplus of about USD 15.1 billion in 2018, Annex (9/1) & Figure (9.1).

**Figure 9.1: Balance of Payments of Arab Countries
(2014-2018)**

Source: Annex 9/1

The total **External Debt** of Arab borrowing countries for which data are available increased by almost 9.6 percent, thus reaching USD 290.1 billion at the end of 2018, compared to almost USD 264.6 billion at the end of 2017. The increase in external indebtedness is due to a number of borrowing countries resorting to external borrowing in order to finance the high fiscal deficit in light of the financial pressures they face. On the other hand, the external public debt service witnessed a significant decline of about 19.9 percent and reached about USD 21.6 billion at the end of 2018, compared to about USD 26.9 billion at the end of 2017. This decline came on the backdrop of a decrease in the external debt service in six Arab countries, whose debt service represents 94 percent of the total external public debt service for borrowing Arab countries as a group.

As for **External Indebtedness Indicators**, the ratio of external public debt to GDP increased by about 4.7 percentage points, compared to the year before, to reach 35.5 percent by the end of 2018, against 30.9 percent at the end of 2017. This came as a result of the accelerated growth of external public debt compared to the growth of GDP at current prices in the Arab borrowing countries as a group. In the same context, the ratio of external public debt service to exports of goods and services in borrowing Arab countries increased by about one percentage point, thus reaching 9.7 percent at the end of 2018, compared to about 13.7 at the end of 2017.

As for the **Arab Currencies Exchange Rates**, the value of the Arab currencies fixed against the dollar has depreciated against the Euro considering the appreciation of the

euro against the dollar during that same year. On the other hand, the value of some Arab currencies in countries that adopt flexible exchange rate regimes, has fallen in light of the pressures witnessed in the external balances of these countries and policies adopted in some of these countries in order to increase the levels of exchange rate flexibility, as well as the local conditions prevailing in some of these countries during 2018.

(Chapter 10)

Thematic Chapter: Financial inclusion in the Arab States: Reality and prospects

Financial inclusion is defined as being “the ability of individuals, and businesses, to have access to a wide range of high-quality formal financial services that are provided in a responsible and sustainable way by a variety of financial service providers in an appropriate and affordable legal and regulatory environment”. Financial inclusion is a top priority for global decision-makers as an economic and development priority because of its significant role in supporting economic growth, reducing income inequality, providing employment, and increasing economic well-being. In addition, financial inclusion helps to achieve nine of the 17 United Nations Sustainable Development Goals (SDGs) by 2030, mainly poverty reduction, combating hunger, and creating more job opportunities.

At the regional level, enhancing financial inclusion levels in the Arab countries is a top priority of the Board of Governors of the Arab Central Banks and Monetary authorities, given the effective role it plays in supporting economic growth, job creation and in achieving sustainable development goals and social welfare. In light of the foregoing, the thematic chapter of the Joint Arab Economic Report for this year addresses “the reality and prospects of financial inclusion in the Arab countries”.

The chapter touched on the importance of financial inclusion and international evidence regarding the direct relationship between financial inclusion and economic growth, which has been proven by many studies. The core of the relationship between these two variables stems from the role of financial inclusion in reducing poverty, decreasing inequalities in income distribution, reducing unemployment, integrating marginalized groups and communities, enabling individuals to invest in the future, avoiding income shocks and fluctuations in consumption levels and lowering financial risks. Consequently, it would increase the income levels of individuals and companies and raise the GDP growth rate.

This chapter sought to evaluate the relationship between some of the financial inclusion variables included in the International Financial Inclusion Index database (Findex) established by the World Bank, and the logarithm of GDP per capita using the cross-

sectional data model for 114 countries worldwide, including thirteen Arab countries. The results showed the importance of financial inclusion variables used in the model to explain the changes in GDP per capita, since it was found that their rise leads to an increase in GDP per capita, at varying proportions. For example, a one percent increase in the individuals having accounts in financial institutions leads to an increase in GDP per capita by about 0.78 percent.

On the other hand, the chapter tackled the reality of financial inclusion in the Arab countries based on a number of financial inclusion indicators for individuals and businesses. Although some of these indicators improved between 2011 and 2017, since the ratio of the adult population having accounts in financial institutions to the total adult population rose from 22.3 percent in 2011 to 37.2 percent in 2017, the Arab region remains among the geographical regions with the lowest financial inclusion levels.

The chapter also shed light on the main challenges of financial inclusion in the Arab countries, including low levels of financial competition, the need to strengthen the infrastructure of the financial sector, and the provision of basic requirements supporting financial inclusion, mainly the availability of efficient payment systems, credit information systems, secured lending systems, and collateral registries for movable assets. In addition, there is a need to develop legislative and regulatory frameworks, strengthen the role of non-banking financial institutions, improve the business environment, and raise financial literacy levels to increase financial inclusion in the Arab region.

In the context of the above-mentioned challenges, the chapter addressed regional and national initiatives to improve financial inclusion levels. In terms of regional initiatives, the Arab Monetary Fund and the Arab Fund for Economic and Social Development have adopted a range of initiatives and interventions aimed at facilitating access to finance for individuals and businesses, particularly for young people, women, rural population, and small and medium-sized enterprises. On the other hand, with regards to national initiatives, the chapter touched on the efforts of the Arab governments to adopt national strategies for financial inclusion.

The chapter also provided some policy recommendations underscoring the importance of strengthening the financial sector infrastructure taking advantage of the opportunities offered by financial technologies (fintech), reinforcing and supporting the role of the non-banking financial sector, providing the necessary prerequisites for financial inclusion and paying more attention to financing micro-enterprises.

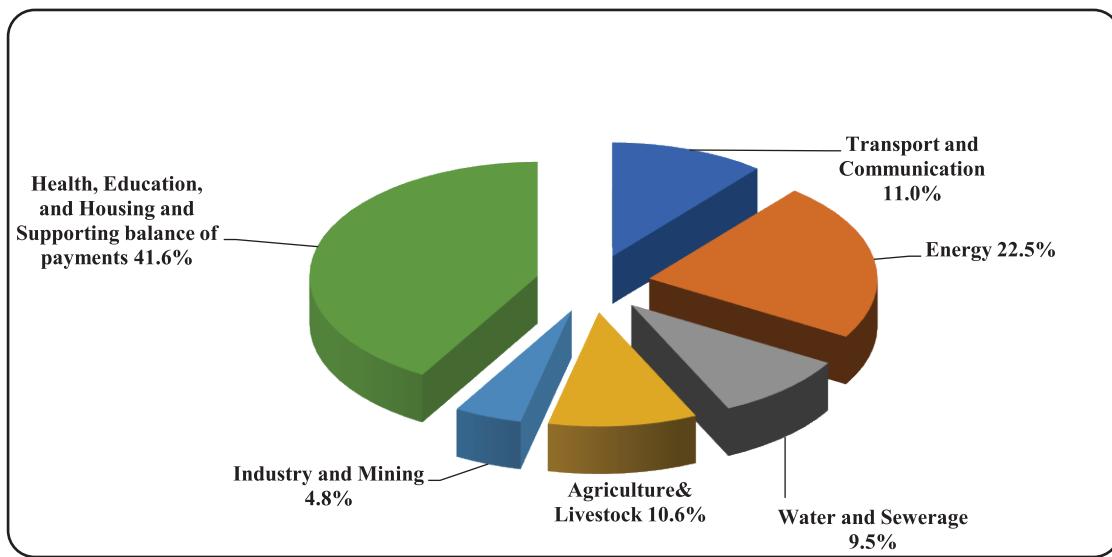

(Chapter 11)

Arab Development Assistance

Arab Development Assistance is provided through various channels, the most important of which are the bilateral government assistance, the Arab countries' contributions through international aid institutions, in addition to assistance provided by national and regional bodies, charities, and NGOs.

The bulk of the **Bilateral Arab Development Assistance** is provided by the Gulf Cooperation Council (GCC) countries of Saudi Arabia, the United Arab Emirates, Kuwait, Qatar, and Oman. Such bilateral government assistance is provided either to support development projects or as direct support to the beneficiary countries' treasury through which funds are spent on development projects and programs. On the other hand, this aid is characterized by providing support to countries so they could implement their development plans and achieve their sustainable development goals while respecting the independence of these countries in defining their goals, setting their development priorities and selecting their projects, while abiding by the rules of full transparency in the various stages of the implementation of funded projects.

Figure 11.1 :Sectoral Distribution of Official Development Assistance Provided by Arab and Regional Development Funds (2018)

Source: Annex 11/6.

The total **Financing Commitments of the Institutions of the Arab Coordination Group**⁽²⁾ amounted to about USD 13.9 billion in 2018, a decrease of about 29 percent compared to the previous year through the provision of 233 loans and 281 aids. This group provided as well technical assistance to finance the preparation of technical and economic feasibility studies for development projects, and support and enhance the capacities of beneficiary countries institutions to enable them to develop technical and administrative human resources and to improve their performance levels. The sectoral distribution of the financing operations of the Institutions of the Arab Coordination Group for 2018 illustrates the continuing interest in supporting infrastructure projects, particularly energy projects of various types. The total development assistance provided to these projects amounted to about USD 3.1 billion, accounting for about 22.5 percent of total aid provided in 2018, Annex (11/6) & Figure (11.1).

The **Cumulative Financing Commitments of the Institutions of the Arab Coordination Group** as of the end of 2018 amounted to about USD 218 billion. The diverse projects encompassed various economic and social sectors and activities. The share of the Arab countries of these funded commitments amounted to about USD 115.3 billion, representing 52.9 percent of the total cumulative commitments.

(Chapter 12)

Inter-Arab Cooperation Towards Liberalizing Trade in Services

The services sector is deemed to be one of the most important sectors supporting growth and development, owing to its impact on fostering economic growth, providing employment opportunities, attracting foreign direct investment and enhancing the competitiveness of other economic sectors, and to its pivotal contribution to production and integration into the global value chains. The exports of the global commercial services grew by 8 percent in 2017, reaching USD 5.28 trillion, thus accounting for about one-third of the value of commodity exports, while continuing to grow by 9.5 percent in 2018, according to UNCTAD data, thus exceeding growth rates achieved by the global commodity exports.

² The institutions of Arab Coordination Group consist of ten institutions, four of which are national institutions including the Kuwait Fund for Arab Development, the Saudi Fund for Development, the Abu Dhabi Fund for Development, and Qatar Development Fund, the other six regional organizations are the Arab Fund for Economic and Social Development, Islamic Development Bank, OPEC Fund for International Development, the Arab Bank for Economic Development in Africa, the Arab Gulf Program for United Nations Development Organizations as well as the Arab Monetary Fund.

The average contribution of the services sector to GDP is around 48 percent in the Arab countries, while its contribution to employment is about 54.9 percent. Aware of the strategic importance of trade in services, the Arab countries have been keen to integrate this sector within the negotiations on intra-regional trade liberalization. It was perceived as a step towards deepening the level of Arab economic integration driven by the desire of Arab countries to establish a robust economic bloc able to take advantage of its resources and to defend its interests before the outside world.

In fact, negotiations between Arab countries on the liberalization of trade in services began formally in early 2001, following the decision of the Economic and Social Council of the League of Arab States to integrate trade in services within the Greater Arab Free Trade Area, in line with the international commitments of Arab States members of the WTO. The Lebanese Government initiated the preparation of a preliminary draft framework agreement to serve as a basis for the negotiation of the progressive liberalization of trade in services. In 2003, the general framework of the Convention was adopted and approved by the Economic and Social Council.

These negotiations were successfully completed in 2017 with ten Arab States submitting their final commitments under the agreement, followed by a decision by the Economic and Social Council to approve the Arab Agreement for the Liberalization of Trade in Services among the Arab States as an independent agreement from the Greater Pan Arab Free Trade Area. The accession of Kuwait to the Convention agreement was then accepted, thus increasing the number of States acceding to this Convention to eleven Arab States, while the remaining Arab States are still seeking to accede to the Convention after fulfilling their commitments.

The agreement is expected to enter into force during the second half of 2019, three months after the date of depositing the ratification documents of three Arab countries with the General Secretariat of the League of Arab States. The Arab Agreement on the Liberalization of Trade in Services between member countries includes thirty-five articles that are very similar to the provisions and structure of the General Agreement on Trade in Services (GATS). The agreement aims at ensuring easy movement of services and services providers between member countries with no restrictions on trade following specific rules and principles by establishing a general framework for the gradual liberalization of trade in services between Arab countries through successive rounds of negotiations.

In this context, the Arab countries, in general, enjoy comparative advantages in many services sectors like tourism, construction and engineering, financial services, education,

and health. Thus, Arab countries have established themselves on the international and regional scenes as a strong and efficient source of many services, unlike goods in which the Arab countries have not achieved the same success. Hence, the Arab Agreement on the liberalization of Trade in Services would help the Arab countries and the trade businesses therein to achieve more opportunities for better access for their exports at the Arab level.

Regional trade agreements are an important tool to advance economic integration programs further. In this regard, the existence of an Arab agreement to liberalize trade in services between Arab countries under the umbrella of the League of Arab States will provide the opportunity of having a permanent platform for Arab countries to discuss ways for Arab cooperation with a view to enhance the competitiveness of trade in services and increase intra-regional trade in services. It would also help to develop the service sectors and increase their value-added to allow Arab countries to keep pace with the depth and breadth of unprecedented development in this sector globally.

Arab countries are currently undertaking negotiations to achieve the Arab Customs Union, which will be followed by negotiations to establish the Arab Common Market, thus deepening the Arab economic integration. Efforts to promote intra-regional commodity trade will not succeed unless it goes hand in hand with the liberalization of trade in services.

In order to maximize the benefits of the Arab Agreement on the Liberalization of Trade in Services, member countries must raise awareness among the private sector about the agreement, and create platforms to communicate with all beneficiaries so as to encourage engagement in new areas of investment in non-traditional sectors, especially those supporting value chains such as services, consultancy, financial services, research and development. In addition, there is a need to explore ways for expanding intra-regional investments in the field of information and communication technology, given the capacity of this sector to support other services sectors. Achieving further liberalization of trade in services among Arab countries requires the adoption of a number of policies, aiming at:

- Ensuring the availability of an appropriate legislative framework to regulate trade in services at the regional level.
- Establishing a Higher Council for Trade in Services to which parties related to the service sectors would be attached, and that will be responsible for drawing up an integrated strategy for developing and upgrading the service sectors and for

determining the level of liberalization of the service sectors that will support the national policy objectives.

- Reviewing existing legislations as a step to make rules and laws more effective and remove unnecessary rules that hinder trade in services.
- Underlining the importance of entering into agreements for mutual recognition and compliance with international standards, and creating an institutional network between regulatory bodies to facilitate data exchange and establish standards for performance evaluation with a view to raise the level of actual liberalization and facilitate the convergence of service sectors.
- Eliminating restrictions on labor mobility between Arab countries, particularly those that negatively affect the full exploitation of liberalization related commitments.
- Joining new rounds of negotiations to reach a higher level of liberalization, in accordance with the provisions of the Agreement on Liberalization of Trade in Services between Arab Countries.

(Chapter 13)

Palestinian Economic Developments

The Growth Rate of the Palestinian economy continued to decline in 2018 due to a series of successive crises at the financial, political, and security levels. Such crises are illustrated by the Israeli aggression on the Palestinian territories which tightens the siege, launches security campaigns, seizes clearance funds, restricts movement and access of individuals and goods.

In this context, the Growth Rate of the GDP at Constant Prices of the Palestinian economy declined to 0.9 percent in 2018 compared to 3 percent in 2017. This slowdown was due to the sharp decline observed in the Gaza Strip by 7 percent during the year 2018. As a result of the Palestinian macroeconomic indicators slowdown. Accordingly, the unemployment rate rose from 29 percent to 31 percent between 2017 and 2018, along with a sharp rise in poverty levels, noting that unemployment did not exceed 14.1 percent in 2000.

The year 2018 witnessed a decrease in net public revenues by 4 percent due to the decline of clearance revenues by 7 percent, with such revenues being the largest contributor to total net public revenues, standing at 66 percent thereof. The Palestinian trade balance

also witnessed a deficit, as the decrease in net current transfers led to a rise in the Palestinian current account deficit by 6 percent during 2018.

Since the occupation of the Palestinian territories, the Israeli economic policy has targeted every effort to adapt Palestinian production structures to the requirements of the Israeli economy, and thus, the Palestinian economy became totally subordinated to the Israeli economy. This was achieved through the control over Palestinian economic resources, the confiscation of agricultural land, unrestricted opening of West Bank, and the Gaza markets to Israeli products. Moreover, Palestinian products were fought through price, confiscation, or export bans, and on the other hand, Israeli authorities prevented Palestinian areas from importing unless passing through them.

These developments have reflected significantly on the Palestinian labor market, which suffers from many challenges that affect its performance, leading to a remarkable rise in unemployment rates, a significant decrease in levels of labor wages, a deterioration of working conditions in the Palestinian labor market and consequently worsening conditions of poverty. This would presage a social and economic crisis, especially since the occupation prevents the Palestinian government from working freely in areas (C) that account for about 60 percent of the West Bank, hence disrupting all the development projects and economic recovery.

* Nationals and expatriates.

(1) The unemployment rate among nationals was estimated at 6.9% and the number of unemployed was around 35,000.

(2) In 2016, the unemployment rate among nationals was estimated at 4.2% and the national labor force was estimated at 197,300 with 8,400 being unemployed.

(3) In 2018, the unemployment rate among nationals was estimated at 12.8% from the labor force. The unemployment rate among females was estimated at 30.9% and among the youth (Age Group of 15-24) at 31.3%.

(4) In 2016, the employed labor among nationals was estimated at 223,100 and among expatriates at 1,848,000. The share of university graduates in unemployment was estimated at 40.2%.

(5) Share of university graduates in unemployed = number of holders of intermediate diploma and higher / total number of unemployed.

(6) In 2018, the unemployment rate among nationals was estimated at 0.2% from the labor force with around 228 being unemployed.

(7) In 2018, the unemployment rate among nationals was estimated at 6.1%, with a rate of 6.3% for males and around 26.6% for youth (Age Group of 15-24).

Sources: Authors' estimations based on Official National sources as well as Regional & International sources with mainly the International Labor Organization (ILO) Database.

Annex Table (2/19) : Summary of Development Indicators in the Arab Countries

Indicator	Year	Value	Index
Population, urban (% of total)	2017	58.6	%
Population ages 0-14 (% of total)	2017	33.1	%
Population ages 15-65 (% of total)	2017	62.4	%
Population ages 65 and above (% of total)	2017	4.5	%
Illiteracy rate, adult total	2017	24.8	%
Illiteracy rate, adult male	2017	17.4	%
Illiteracy rate, adult female	2017	32.8	%
Illiteracy rate, youth total	2017	13.2	%
Illiteracy rate, youth male	2017	10.8	%
Illiteracy rate, youth female	2017	15.8	%
Gender literacy gap, adult total	2012 - 2005	0.8	
Gender literacy gap, youth total	2012 - 2005	0.9	
Total enrollment, primary (% net)	2017	87.4	%
Total enrollment, primary, Male (% net)	2017	88.2	%
Total enrollment, primary, Female (% net)	2017	86.6	%
Gender enrollment gap in primary education	2017	0.99	
Expected years of schooling in primary education, Total	2017	11.9	years
Expected years of schooling in primary education, Male	2017	12.3	years
Expected years of schooling in primary education, Female	2017	11.7	years
Dropout rate in primary education, Total	2017	11.5	%
Dropout rate in primary education, Male	2017	10.8	%
Dropout rate in primary education, Female	2017	12.3	%
Public expenditure on education as a percentage of GNP	2017	4.0	%
Public expenditure on education as a percentage of total public expenditure	2017	11.7	%
Life expectancy at birth, total (years)	2017	74.0	years
Total fertility rate, (births per woman)	2017	3.2	child
Mortality rate, infant (per 1,000 live births)	2017	27.0	child
Mortality rate, under-5 (per 1,000 live births)	2017	36	child
Total expenditure on health as a percentage of GDP	2016	4.8	%
Public expenditure on health as a percentage of total expenditure on health	2016	63.2	%
Improved water sources (% of population with access)	2016	93.0	%
Improved water sources, urban (% of urban population with access)	2016	96.0	%
Improved water sources, rural (% of rural population with access)	2016	86.0	%
Improved sanitation facilities (% of population with access)	2016	88.0	%
Improved sanitation facilities, urban (% of urban population with access)	2016	93.0	%
Improved sanitation facilities, urban (% of rural population with access)	2016	80.0	%

* Preliminary estimates.

Remarks:

1/ 50% of the Divided Zone's oil reserves is added to each of Saudi Arabia and Kuwait oil reserves.

2/ World's oil reserves exclude Bitumen and extra heavy oil in Venezuela.

3/ Canada's oil reserves exclude unconventional reserves such as oil sands.

4/ Total OPEC countries include Gabon (starting from 2016), Equatorial Guinea (from 2017) and Congo (from 2018).

Total	100										

* Preliminary Data.

(1) Commodity Structure is classified according to Revision 2 of the Standard International Trade Classification (SITC).

(2) Agricultural commodities: SITC sections 0,1,2,4 minus divisions 27,28.

(3) Mining Products: SITC sections 3, and divisions 27, 28 and 68.

(4) Manufactures: SITC sections 5,6,7,8 minus divisions 68 and 891.

Mining & Quarrying Products ⁽³⁾	21.5	18.2	15.9	16.1	17.2	17.8	33.9	28.9	24.1	25.3	25.9
Manufactures ⁽⁴⁾	50.7	55.0	59.6	60.2	58.3	56.8	43.3	46.5	46.1	46.1	46.2
Chemicals	12.4	15.1	18.3	17.9	18.1	16.4	13.4	14.7	12.4	12.1	13.0
Basic manufactures	19.4	18.4	17.9	18.1	18.2	18.4	19.1	17.3	17.5	17.7	17.6
Machinery and transport equipment	6.3	8.0	10.5	10.4	9.9	9.0	7.0	8.8	10.3	10.1	9.9
Other miscellaneous manufactures	12.6	13.5	12.9	13.8	12.1	13.0	3.8	5.7	5.9	6.2	5.5
Commodities not classified elsewhere ⁽⁵⁾	5.8	6.0	4.9	4.3	4.6	5.1	4.2	7.3	8.6	8.0	7.3
Total	100	100	100	100	100	100	100	100	100	100	100

* Preliminary data.

⁽¹⁾ Commodity Structure is classified according to Revision 3 of the Standard International Trade Classification (SITC).

⁽²⁾ Agricultural commodities : SITC sections 0, 1, 2, 4 minus divisions 27, 28.

⁽³⁾ Mining Products: SITC sections 3, and divisions 27, 28, 68.

⁽⁴⁾ Manufactures: SITC sections 5, 6, 7, 8 minus divisions 68, 891.

⁽⁵⁾ Commodities not classified elsewhere: SITC section 9 and division 891.

Annex Table (9/10) : Summary Features of Exchange Rate Arrangements in Arab Countries (2018)

(*) Indicates that this is a feature of the country's exchange rate arrangement;

(-) Indicates that this is not a feature of the country's exchange rate arrangement.

(1) Article VIII - Section 2: A member shall not impose restrictions on the making of payments and transfers for current international transactions; - Section 3: No member shall engage in any discriminatory currency arrangements, or multiple currency practices. Section 4: each member shall endeavor, the convertibility of foreign held balances

currency arrangements or multiple currency practices; - Section 4: each member shall guarantee the convertibility of foreign held balances.

(2) Article XIV: A Member shall notify the Fund whether it intends to avail itself of the transitional arrangements for maintaining any exchange restrictions inconsistent with article VIII, Section 2, prior to adopting measures to change circumstances which were in effect on the date on which it became a member.

Yemen	87.1	2.12	187	13%	...	1.6
Arab World	74.5	3.6	...	30%	32.9	11.6

⁽¹⁾ Banking concentration: It is measured through the total assets of the three largest banks as a percentage of the total assets of the banking system. The data is for 2016 except for Sudan and Djibouti with data for 2015.

⁽²⁾ Banking competition: 2016 data are measured by what is known as the net interest margin, which represents the difference between interest income (the difference between the lending and deposit interest rates).

⁽³⁾ Business environment: The ranking of Arab countries in relation to the countries of the world in the business environment report issued by the World Bank, which relates to some of the facilitating aspects of doing business, such as ease of access to finance and access to electricity and others.

⁽⁴⁾ Financial education: It is the number of financially educated adults as a percentage of the total population.

(12-1) Annex
Commitments made by Arab countries within the framework of
"the agreement to liberalize trade in services between Arab countries"

Countries that submitted schedules of Commitments within the Arab Agreement	Membership status in the WTO	Level of liberalization provided within the framework of the Arab agreement	Number of sectors committed under the Arab agreement	GATS plus commitments provided in the Arab agreement
Jordan	Member	Jordan schedule of commitments within the framework of the Arab agreement is identical to its schedule of commitments under GATS-WTO	11 Sectors: -Business services -Communication services -Construction and related engineering services -Distribution services -Educational services. -Environmental services -Financial services -Health and Social services -Tourism and travel related services -Recreational, cultural and sporting services -Transport Services	
United Arab Emirates	Member	UAE schedule of commitments within the Arab agreement provides higher level of liberalization than its schedule of commitments under GATS-WTO	7 Sectors: -Business services. -Communication services - Construction and related engineering services - Environmental service . - Financial services -Tourism and travel related services. - Transport Services .	New subsectors have been liberalized as legal services, rental and leasing without operators, translation, courier, telecommunication, insurance and maritime transport. Foreign capital equity permitted has increased from 49% to 78% in some sectors with the requirement to transfer technology and R&D programs and technical support to national human capital.
Saudi Arabia	Member	KSA schedule of commitments within the framework of the Arab agreement is identical to its schedule of commitments under GATS-WTO. As a newly acceding country to WTO, it was granted an exception to provide the same level of liberalization as the WTO, as its schedule of commitments under the WTO is characterized by a high level of liberalization	11 Sectors: - Business services - Communication services. - Construction and related engineering services -Distribution services -Educational services -Environmental services -Financial services -Health and Social services -Tourism and travel related services -Recreational, cultural and sporting services -Transport Services	
Sudan	-	Sudan schedule of commitments under the Arab agreement provides lower level of liberalization than what is provided within its accession offer to the WTO.	4 Sectors: -Communication services -Financial services -Tourism and travel related services -Financial services	Sudan is a least developed country where it was granted an exception that allows her not to provide higher level of liberalization than what is provided within its WTO accession offer.
Qatar	Member	Qatar schedule of commitments within the framework of the Arab agreement provides higher level of liberalization than what is provided by its schedule of commitments under GATS.	6 Sectors: -Business services -Communication services -Construction and related engineering services -Environmental services -Financial services -Tourism and travel related services	Architecture engineering and construction services have deeper liberalization in the Arab agreement than WTO, as it is permitted for parties to the Arab agreement to access projects that have a value less than 100 USD million, with a capital that doesn't exceed 49%.

Annex (12-1) cont.
Commitments made by Arab countries within the framework of
"the agreement to liberalize trade in services between Arab countries"

Countries that submitted schedules of Commitments within the Arab Agreement	Membership status in the WTO	Level of liberalization provided within the framework of the Arab agreement	Number of sectors committed under the Arab agreement	GATS plus commitments provided in the Arab agreement
Oman	Member	Oman schedule of commitments within the framework of the Arab agreement is identical to its schedule of commitments under GATS-WTO, only commitments linked to expired dates have been removed. Oman is not a founding member of the WTO and hence is exempted from providing higher level of liberalization than what is provided under the WTO as its WTO schedule is characterized by a high level of liberalization.	10 Sectors: -Business services -Communication services -Construction and related engineering services -Distribution services -Educational services -Environmental services -Financial services -Health and Social services -Tourism and travel related services -Transport Services	Removed all restrictions that were linked to expired dates for their application. The allowable foreign equity participation referred to in the horizontal commitments has been increased from 49% to 70% according to the commitments that refers to January 2001 for this modification.
Lebanon	-	Lebanon schedule of commitments provided within the Arab agreement reflects higher level of liberalization than what is provided by its accession offer to the WTO.	10 Sectors: -Business services -Communication services -Construction and related engineering services -Distribution services -Environmental services -Financial services -Health and Social services -Tourism and travel related services -Recreational, cultural and sporting services -Transport Services	Liberalization of mode 1 (cross border supply of services) for building cleaning services, and packaging services (other business services), and sewage services. In addition to deeper commitments in financial services.
Egypt	Member	Egypt's schedule of commitments under the Arab agreement reflects higher level of liberalization than what is provided in its schedule of commitments under the WTO.	6 Sectors: -Business services -Communication services -Construction and related engineering services -Financial services -Tourism and travel related services -Transport Services	Liberalizing additional sub-sectors as legal services, medical services, engineering services, computer services, courier services, air transport services, and provide deeper level of liberalization in construction service, other financial services and insurance services.
Morocco	Member	Morocco schedule of commitments under the Arab agreement reflects higher level of liberalization than what is provided in its schedule of commitments under the WTO, but it is below the level of liberalization provided in its offer within the Doha round of negotiations.	7 Sectors: -Business services -Construction and related engineering services -Communication services -Environmental services -Financial services -Tourism and travel related services -Transport Services	More liberalization has been provided on new sub-sectors: postal and courier, in addition to further liberalization on telecommunication sector. Yet postal services is unbound for all modes of supply except mode 4 (movement of natural persons) that refers to horizontal commitments.
Yemen	Member	Yemen schedule of commitments within the framework of the Arab agreement is identical to its schedule of commitments under GATS-WTO.	11 Sectors: -Business services -Communication services -Construction and related engineering services -Distribution services -Educational services -Environmental services -Financial services -Health and Social services -Tourism and travel related services -Recreational, cultural and sporting services -Transport Services	Yemen is a least developed country where it was granted an exception that allows her not to provide higher level of liberalization than what is provided within its GATS schedule of commitments. In addition, it is a newly acceding country to the WTO (year 2012) where its schedule of commitments reflects high level of liberalization.

الملاحق الإحصائية

شهد عام 2018 انخفاض صافي الإيرادات العامة بنسبة 4 في المائة مقارنة مع عام 2017 نتيجة لتراجع إيرادات المقاصلة بنسبة 7 في المائة مقارنة مع عام 2017، التي تُعتبر المساهم الأكبر في إجمالي صافي الإيرادات العامة بما نسبته 66 في المائة. فيما شهد الميزان التجاري الفلسطيني عجزاً، إذ أدى انخفاض صافي التحويلات الجارية إلى ارتفاع عجز الحساب الجاري الفلسطيني بنسبة 6 في المائة خلال عام 2018.

استهدفت السياسة الاقتصادية الإسرائيلية منذ احتلالها للأراضي الفلسطينية كل جهد ممكن لنكيف البنية الإنتاجية الفلسطينية بما يلائم متطلبات الاقتصاد الإسرائيلي، حيث أصبح الاقتصاد الفلسطيني تابعاً وخاضعاً كلياً للاقتصاد الإسرائيلي وذلك من خلال السيطرة على الموارد الاقتصادية الفلسطينية ومصادر الأرضيات الزراعية وفتح أسواق الضفة وغزة لمنتجاتها دون قيود، ومحاربة المنتجات الفلسطينية عن طريق الأسعار أو المصادر أو منع التصدير، ومن جهة ثانية منعت إسرائيل المناطق الفلسطينية من الاستيراد إلا من خلالها.

انعكست هذه التطورات بشكل ملحوظ على سوق العمل الفلسطيني الذي يعاني من الكثير من التحديات التي تؤثر على أدائه بما أسف عن ارتفاع ملحوظ لمعدلات البطالة، وانخفاض ملموس لمستويات أجور العمال، وتدهور ظروف العمل في سوق العمل الفلسطيني ومن ثم تفاقم لأوضاع الفقر. وهو ما ينذر بوقوع أزمة اجتماعية واقتصادية، خاصة وأن الاحتلال يمنع الحكومة الفلسطينية من العمل بحرية في مناطق (C) التي تشكل حوالي (60 في المائة) من مساحة الضفة الغربية، ما يعطى كل مشاريع التنمية ومحاولات النهوض الاقتصادي وينتسب بالتفويض المستمر والمتالي لخطط التنمية.

القيمة المضافة لتلك الخدمات مما يسمح للدول العربية بمواكبة عمق واتساع التطور الغير مسبوق في هذا القطاع عالمياً.

تفاوض الدول العربية حالياً للوصول إلى الاتحاد الجمركي العربي الذي سيتبعه التفاوض للوصول إلى السوق العربية المشتركة درجة أعمق من التكامل الاقتصادي العربي، ولن تنجح مجهودات تعزيز التجارة العربية البينية السلعية دون المضي جنباً إلى جنب في تحرير التجارة في الخدمات في المنطقة العربية وتعزيز التجارة البينية العربية في الخدمات.

ولكي يتسعى الاستفادة القصوى من اتفاقية تحرير التجارة في الخدمات بين الدول العربية لابد للدول العربية الاعضاء في الاتفاقية الترويج وزيادةوعي القطاع الخاص بالاتفاقية، وخلق منصات للتواصل مع كل الجهات المستفيدة لتشجيع الدخول في مجالات جديدة للاستثمار في القطاعات غير التقليدية خاصةً تلك الداعمة لسلسل القيمة مثل خدمات الاستشارات والخدمات المالية والتعبئة والبحث والتطوير، إضافة إلى بحث سبل التوسيع في الاستثمارات البينية في مجال تقنية المعلومات والاتصالات خاصةً لما لها من القدرة على امتصاص الأزمات ودعم باقى القطاعات. يستلزم الوصول إلى المزيد من تحرير تجارة الخدمات ما بين الدول العربية تبني عدد من السياسات من بينها:

- السعي إلى ضمان توفر الإطار التشريعي الملائم لتنظيم تجارة الخدمات على المستوى الإقليمي.
- إنشاء مجلس أعلى للتجارة في الخدمات تقع تحت مظلته كافة الجهات ذات الصلة بالقطاعات الخدمية يختص بوضع استراتيجية متكاملة لتنمية وتطوير القطاعات الخدمية وتحديد ومستوى تحرير القطاعات الخدمية الذي سيدعم أهداف السياسة الوطنية.
- مراجعة التشريعات كخطوة لجعل القواعد والقوانين أكثر فاعلية وحذف القواعد غير الضرورية والمغيرة لحركة التجارة.
- أهمية الدخول في اتفاقيات للاعتراف المتبادل والتوافق مع المعايير الدولية، وخلق شبكة مؤسسية بين الأجهزة التنظيمية لتسهيل تبادل البيانات ولووضع معايير لتقدير الأداء لرفع مستوى التحرير الفعلى وتسهيل تقارب القطاعات الخدمية.
- تذليل القيود المفروضة على انتقال العمالة فيما بين الدول العربية ولاسيما تلك التي تتعكس سلباً على الاستفادة الكاملة من التزامات التحرير.
- الحاجة إلى دخول في جولات جديدة من التفاوض للوصول إلى مستوى أعلى من التحرير، وذلك وفقاً لنبرود اتفاقية تحرير التجارة في الخدمات بين الدول العربية.

(فصل تطورات الاقتصاد الفلسطيني في ظل الاحتلال)

الاقتصاد الفلسطيني

واصل الاقتصاد الفلسطيني خلال عام 2018 تراجعه لارتباط أدائه بسلسلة من الأزمات المتتالية على الصعيد المالي والسياسي والأمني، تمثلت بالاعتداءات الإسرائيلية على الأرضي الفلسطينية عبر تشديد الحصار وشن الحروب والحملات الأمنية، والاحتجاز على أموال المقاومة، وتقييد حرقة التنقل والنفاذ للأفراد والبضائع وتذبذب حجم المساعدات الخارجية وانخفاضها في السنوات الأخيرة.

في هذا الإطار، تراجع معدل نمو الناتج المحلي الإجمالي في فلسطين بالأمسار الثابتة عام 2018 ليصل إلى 0.9 في المائة مقارنة مع 3 في المائة عام 2017، ونتج هذا التباطؤ عن التراجع الحاد في قطاع غزة بنسبة 7 في المائة خلال عام 2018. انعكاساً لتباين مؤشرات الاقتصاد الكلي الفلسطيني، شهدت جميع الأنشطة الاقتصادية في قطاع غزة انخفاضاً في أعداد العاملين. وعليه ارتفع معدل البطالة من 29 في المائة إلى 31 في المائة، فيما بين عامي 2017 و2018، مع ما يصاحب ذلك من ارتفاع مستويات الفقر بصورة حادة، علماً بأن معدلات البطالة لم تكن قد تجاوزت 14.1 في المائة عام 2000.

أمريكي، بما يمثل نحو ثلث قيمة صادرات السلع، فيما يقدر مواصلتها النمو بنسبة 9.5 في المائة لعام 2018 وفق بيانات الأونكتاد، وهو ما يفوق معدلات النمو المسجلة على صعيد الصادرات السلعية.

فيما يتعلق بالدول العربية، يبلغ متوسط مساهمة قطاع الخدمات في الناتج الإجمالي 48 في المائة، فيما تبلغ مساهمته في التشغيل بنحو 54.9 في المائة. حرصت البلدان العربية على إدماج التجارة في الخدمات ضمن مفاوضات تحرير التجارة البنائية إدراكاً من الدول العربية للأهمية الاستراتيجية لتجارة الخدمات، وخطوة نحو تعزيز مستوى التكامل الاقتصادي العربي مدفوعةً برغبة الدول العربية في تحقيق تكامل اقتصادي قوي قادر على الاستفادة من موارده وله القدرة على الدفاع عن مصالحه أمام العالم الخارجي.

بدأت المفاوضات بين الدول العربية بشأن تحرير التجارة في الخدمات رسمياً في مطلع عام 2001، بعد قرار المجلس الاقتصادي والاجتماعي لجامعة الدول العربية بإدماج التجارة في الخدمات ضمن منطقة التجارة الحرة العربية الكبرى وذلك توافقاً مع الالتزامات الدولية للدول العربية للأعضاء بمنظمة التجارة العالمية. وقد بادرت الحكومة اللبنانية بإعداد مشروع مبدئي لاتفاق إطاري ليتمثل قاعدة للتفاوض حول التحرير التدريجي للتجارة في الخدمات، فيما تم في عام 2003، اعتماد الإطار العام للاتفاقية وإقرارها من قبل المجلس الاقتصادي والاجتماعي.

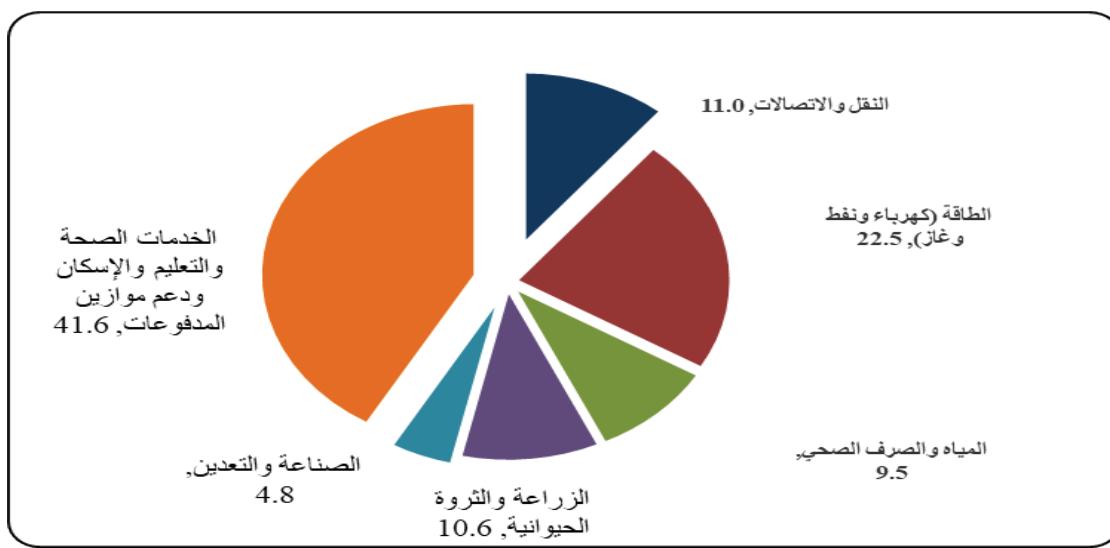

كللت هذه المفاوضات بالنجاح في عام 2017 بتقديم عشرة دول عربية جداول التزاماتها النهائية في إطار الاتفاقية ومن ثم صدور قرار من المجلس الاقتصادي والاجتماعي بإقرار الاتفاقية العربية لتحرير التجارة في الخدمات بين الدول العربية كاتفاقية مستقلة عن منطقة التجارة الحرة العربية الكبرى، وتلا ذلك قبول عرض دولة الكويت للانضمام إلى الاتفاقية ليرفع عدد الدول المنضمة لهذه الاتفاقية إلى إحدى عشرة دولة عربية، فيما لا تزال الدول العربية الأخرى تسعى للانضمام إلى الاتفاقية بعد استيفاء جداول التزاماتها.

من المتوقع أن تدخل الاتفاقية حيز التنفيذ خلال النصف الثاني من عام 2019، وذلك بعد ثلاثة أشهر من تاريخ إيداع وثائق تصديق ثلاثة دول عربية عليها لدى الأمانة العامة لجامعة الدول العربية. تضمنت الاتفاقية العربية لتحرير التجارة في الخدمات بين الدول العربية خمسة وثلاثين مادة تتشابه إلى حد كبير مع نصوص وهيكل الاتفاقية العامة للتجارة في الخدمات (الجاتس)، حيث تهدف الاتفاقية إلى تحقيق سهولة انتساب الخدمات ومورديها بين الدول العربية الأعضاء في الاتفاق دون عقبات مُقيدة للتجارة وفي ظل قواعد ومبادئ محددة من خلال وضع إطار عام للتحرر التدريجي للتجارة الخدمات بين الدول العربية عبر جولات متالية من المفاوضات.

في هذا الإطار، تتمتع البلدان العربية بصفة عامة بمميزات نسبية في قطاعات الخدمات السياحية والسفر، والتشييد والهندسة، والبعض الآخر في الخدمات المالية (المصارف وسوق المال، والتأمين). كما أن مجموعة أخرى من الدول العربية لديها قدرات في الخدمات التعليمية والصحية، وغيرها من مجالات الخدمات الأخرى. وقد أثبتت الدول العربية وجودها على الساحة الدولية والإقليمية كمصدر قوي وكفاءة للعديد من الخدمات (مثل النقل والسياحة والإنشاءات والاتصالات) على عكس السلع التي لم تتحقق فيها الدول العربية نفس النجاح، بل أن هناك العديد من المؤسسات والشركات العربية التي أصبحت منافسة على الصعيد العالمي. ومن هنا تأتي أهمية الاتفاقية العربية للتجارة في الخدمات والتي من شأنها أن تساعد الدول العربية بمؤسساتها التجارية على تحقيق المزيد من فرص نفاذ أفضل لصادراتها على الصعيد العربي.

إن اتفاقات التجارة الإقليمية تعد بمثابة أداة هامة للدفع قدماً ببرامج التكامل الاقتصادي بصورة أكثر عمقاً. في هذا الصدد، سوف يتيح وجود اتفاق عربي لتحرير التجارة في الخدمات بين الدول العربية تحت مظلة جامعة الدول العربية الفرصة لتوسيع منصة دائمة للدول العربية لمناقشة سبل التعاون العربي لتعزيز القدرة التنافسية للتجارة في الخدمات ورفع معدلات التجارة البنائية العربية، والعمل على تطوير طبيعة الأنشطة الخدمية وزيادة

الشكل (1.11): التوزيع القطاعي للمعونة الإنمائية التراكمية المقدمة من صناديق التنمية العربية (2018)

المصدر: الملحق (11/6).

بلغ إجمالي التزامات العمليات التمويلية لمؤسسات مجموعة التنسيق في عام 2018 حوالي 13.9 مليار دولار، أي بانخفاض بلغ نسبته حوالي 29 في المائة بالمقارنة مع العام السابق من خلال تقديم 233 قرضاً و281 معونة. كما قدمت مؤسسات مجموعة التنسيق المساعدات الفنية لتمويل إعداد دراسات الجدوى الفنية والاقتصادية للمشاريع الإنمائية، ودعم وتعزيز قدرة مؤسسات الدول المستفيدة لتمكينها من تطوير الكوادر الفنية والإدارية ولتحسين مستويات أدائها. يوضح التوزيع القطاعي للعمليات التمويلية لمؤسسات مجموعة التنسيق لعام 2018، الاهتمام المتواصل بدعم مشروعات البنى الأساسية وعلى وجه الخصوص مشاريع الطاقة بمختلف أنواعها. إذ بلغ إجمالي المساعدات الإنمائية الموجهة لهذه المشروعات حوالي 3.1 مليار دولار تشكل حوالي 22.5 في المائة من إجمالي المساعدات المقدمة خلال عام 2018.

بلغ المجموع التراكمي للالتزامات العمليات التمويلية لمؤسسات مجموعة التنسيق حتى نهاية عام 2018 حوالي 218 مليار دولار. وتنوع المشاريع لتشمل مختلف القطاعات والنشاطات الاقتصادية والاجتماعية. وقد بلغ نصيب مجموعة الدول العربية من هذه الالتزامات الممولة حوالي 115.3 مليار دولار بما يمثل 52.9 في المائة من إجمالي الالتزامات التراكمية.

(فصل التعاون الاقتصادي العربي المشترك)

التعاون العربي في مجال تحرير تجارة الخدمات

يعد قطاع الخدمات أحد أهم القطاعات الداعمة للنمو والتنمية، لما له من أثر في دعم النمو الاقتصادي، وتوفير فرص العمل، وجذب الاستثمارات الأجنبية المباشرة وتدعم تنافسية القطاعات الاقتصادية الأخرى، وإسهامه المباشر في الإنتاج كونه يمثل حلقة هامة للاندماج في سلاسل القيمة العالمية. حققت صادرات الخدمات التجارية على المستوى العالمي نمواً بنسبة 8 في المائة في عام 2017، حيث بلغت 5.28 تريليون دولار

السكان البالغين من 22.3 في المائة عام 2011 إلى 37.2 في المائة في عام 2017، إلا أن المنطقة العربية لا تزال من أقل المجموعات الجغرافية من حيث مستويات الشمول المالي.

اهتم الفصل كذلك بإلقاء الضوء على أبرز تحديات الشمول المالي في الدول العربية بما يشمل انخفاض مستويات المنافسة المالية، وال الحاجة إلى تقوية البنية التحتية للقطاع المالي، وتوفير المتطلبات الأساسية الداعمة للشمول المالي ومن أبرزها بينها توفر أنظمة كفؤة للدفع، ونظم للاستعلام الائتماني، ونظم الإقراض المضمون، وسجلات الأصول. علاوة على الحاجة إلى تطوير الأطر التشريعية والتنظيمية، وتقوية دور المؤسسات المالية غير المصرفية، وتطوير بيانات الأعمال، ورفع مستويات التنفيذ المالي.

في سياق التحديات السابق الإشارة إليها، تطرق الفصل إلى المبادرات الإقليمية والقطريّة المبذولة لتحسين مستويات الشمول المالي. فعلى صعيد المبادرات الإقليمية يتبنّى كل من صندوق النقد العربي، والصندوق العربي للإنماء الاقتصادي والاجتماعي مجموعة من المبادرات والتدخلات الهادفة إلى تيسير فرص نفاذ الأفراد والمشروعات إلى التمويل لاسيما فيما يتعلق بنفذ الشباب والإثاث وسكن المناطق الريفية للتمويل والم المشروعات الصغيرة والمتوسطة. من جانب آخر، وعلى مستوى المبادرات القطرية، تطرق الفصل إلى جهود الحكومات العربية على صعيد تبني استراتيجيات وطنية للشمول المالي، إضافة إلى مساعي المصارف المركزية ومؤسسات النقد العربية لتبني برامج وسياسات لحفز نفاذ المشروعات متانة الصغر والصغر والمتوسطة للتمويل المصرفية وغير المصرفية.

اهتم الفصل بتقديم بعض التوصيات على صعيد عملية صنع السياسات ذلك بما يشمل: تبني استراتيجيات وفق رؤى قومية للشمول المالي، وتعزيز البنية الأساسية للشمول المالي، والاستفادة من الفرص التي تقدمها التقنيات المالية الحديثة لرفع مستوى الشمول المالي، وتقوية ودعم دور القطاع المالي غير المصرفية، وضرورة توفير المتطلبات الأساسية الازمة للشمول المالي، وتوجيه المزيد من الاهتمام بتمويل المشروعات متانة الصغر.

العون الإنمائي العربي

تقدم المساعدات الإنمائية العربية عبر قنوات متعددة ومختلفة أهمها المساعدات الحكومية الثانية، ومساهمات الدول العربية من خلال المؤسسات الدولية المانحة للعون، إضافة إلى المساعدات المقدمة من الهيئات الوطنية والإقليمية والهيئات الخيرية والمنظمات غير الحكومية.

يقدم الجزء الأكبر من العون الإنمائي العربي على المستوى الثاني من دول مجلس التعاون لدول الخليج العربية وهي المملكة العربية السعودية، دولة الإمارات العربية المتحدة، دولة الكويت، دولة قطر، وسلطنة عمان. وتوجه المساعدات الحكومية الثانية إما لدعم مشروعات التنمية أو كدعم مباشر لخزينة الدول المستفيدة بحيث يتم من خلالها الإنفاق على المشاريع والبرامج التنموية. ومن جانب آخر يتسم هذا العون في تقدير الدعم للدول لتنفيذ خططها الإنمائية وتحقيق أهداف التنمية المستدامة الخاصة بها مع احترام استقلالية هذه الدول في تحديد أهدافها وترتيب أولوياتها الإنمائية و اختيار مشاريعها، والالتزام بقواعد الشفافية التامة في مختلف مراحل تنفيذ المشاريع الممولة.

عكسَتْ أسعار صرف العملات العربية المثبتة مقابل الدولار التطورات التي شهدتها العملات الرئيسية في أسواق الصرف الدولي خلال عام 2018 حيث تراجعت قيمة هذه العملات مقابل اليورو في ظل ارتفاع قيمة اليورو مقابل الدولار خلال ذلك العام. من جانب آخر تراجعت قيمة بعض عملات الدول العربية التي تتبنى نظاماً أكثر مرونة لأسعار الصرف مقابل اليورو والدولار على ضوء الضغوطات التي شهدتها التوازنات الخارجية لهذه البلدان والسياسات التي تم تبنيها في بعض تلك الدول لزيادة مستويات نظم الصرف، وكذلك الأوضاع المحلية التي شهدتها بعض هذه الدول خلال عام 2018.

(فصل محور التقرير)

الشمول المالي في الدول العربية: الواقع والآفاق

يعرف الشمول المالي بكونه "إمكانية وصول الأفراد، بما فيهم أصحاب الدخل المنخفض، والشركات، إلى مجموعة واسعة من الخدمات المالية الرسمية ذات جودة عالية، يتم توفيرها بطريقة مسؤولة ومستدامة من قبل مجموعة متنوعة من مقدمي الخدمات المالية في بيئه قانونية وتنظيمية مناسبة وبكلفة معقولة". يأتي الشمول المالي على رأس أولويات صناع القرار على مستوى العالم كأولوية اقتصادية وإنمائية نظراً لدوره الكبير في دعم النمو الاقتصادي، وتقليل التفاوت في توزيع الدخل، وتوفير فرص العمل، وزيادة مستويات الرفاه الاقتصادي. إضافة لما سبق يساعد الشمول المالي على تحقيق تسعة من الأهداف السبعة عشرة التي أقرتها الأمم المتحدة لتحقيق التنمية المستدامة بحلول عام 2030 على رأسها خفض الفقر، ومكافحة الجوع، وخلق المزيد من فرص العمل.

على المستوى الإقليمي، يمثل تعزيز مستويات الشمول المالي في الدول العربية محوراً هاماً من محاور اهتمامات مجلس محافظي المصارف المركزية ومؤسسات النقد العربية لما لذلك من دور فعال في دعم النمو الاقتصادي، وخلق فرص العمل، وتحقيق أهداف التنمية المستدامة والرفاه الاجتماعي. على ضوء ما سبق، يهتم فصل محور التقرير الاقتصادي العربي الموحد لهذا العام بتناول موضوع واقع وآفاق الشمول المالي في الدول العربية.

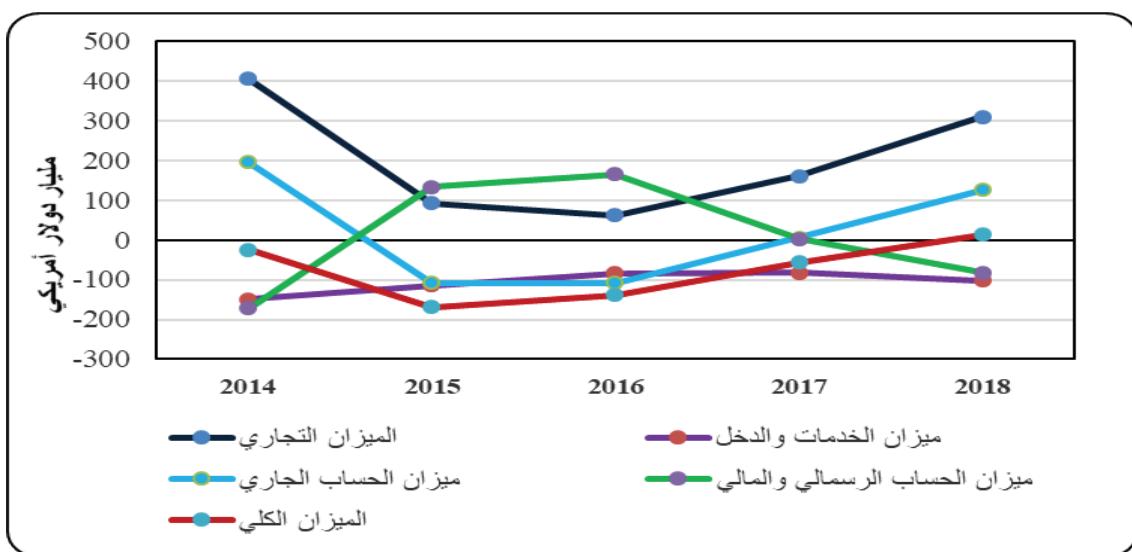

تطرق الفصل إلى أهمية الشمول المالي والدلائل الدولية فيما يتعلق بالعلاقة الطردية ما بين الشمول المالي والنمو الاقتصادي والتي أثبتتها العديد من الدراسات. يتبع جوهر العلاقة ما بين المتغيرين إلى دور الشمول المالي في خفض الفقر، وتقليل مستويات التفاوت في توزيع الدخل، وخفض معدلات البطالة، ودمج الفئات والمجموعات المهمشة، وتمكين الأفراد من الاستثمار في المستقبل، وتجنب صدمات الدخل، والتقلبات في مستويات الاستهلاك، وخفض المخاطر المالية وبالتالي زيادة مستويات دخل الأفراد والشركات ورفع معدل نمو الناتج المحلي الإجمالي.

تم في إطار هذا الفصل تقدير العلاقة بين بعض متغيرات الشمول المالي المتضمنة في قاعدة بيانات المؤشر الدولي للشمول المالي Findex الصادر عن البنك الدولي، ولوغاريتmic نصيب الفرد من الناتج المحلي الإجمالي باستخدام نموذج البيانات المقطعية لعدد 114 دولة على مستوى دول العالم من بينها ثلاثة عشرة دولة عربية. أظهرت النتائج معنوية متغيرات الشمول المالي المستخدمة في النموذج في تفسير التغييرات في نصيب الفرد من الناتج المحلي الإجمالي، حيث تبين أن ارتفاعها يؤدي إلى زيادة نصيب الفرد من الناتج المحلي الإجمالي بنسبة متفاوتة. فعلى سبيل المثال، يؤدي ارتفاع نسبة امتلاك الأفراد البالغين للحسابات في المؤسسات المالية بواحد في المائة إلى رفع نصيب الفرد من الناتج المحلي الإجمالي بحوالي 0.78 في المائة.

من جانب آخر، تطرق الفصل إلى واقع الشمول المالي في الدول العربية استناداً إلى عدد من مؤشرات الشمول المالي للأفراد والمشروعات، وبين أنه على الرغم من تحسن بعض مؤشرات الشمول المالي ما بين عامي 2011 و2017، حيث ارتفعت نسبة السكان البالغين الذين يمتلكون حسابات في مؤسسات المالية إلى إجمالي

التحويلات بنسب بلغت حوالي 24.3 بالمائة و 11.3 في المائة على التوالي خلال عام 2018. كنتيجة لذلك ارتفع فائض ميزان المعاملات الجارية المحقق للدول العربية كمجموعه خلال عام 2018 إلى حوالي 133.9 مليار دولار، بما يعادل 5.0 بالمائة من الناتج المحلي الإجمالي للدول العربية كمجموعه خلال عام 2018. كمحصلة للتطورات المذكورة السابقة تحول العجز الكلي لموازين مدفوعات الدول العربية كمجموعه المسجل خلال عام 2017 والبالغ نحو 56.3 مليار دولار إلى فائض قدره حوالي 15.1 مليار دولار خلال عام 2018، الملحق (1/9) والشكل (1.9).

الشكل (1.9): ميزان المدفوعات في الدول العربية (2018-2014)

المصدر: الملحق (1/9).

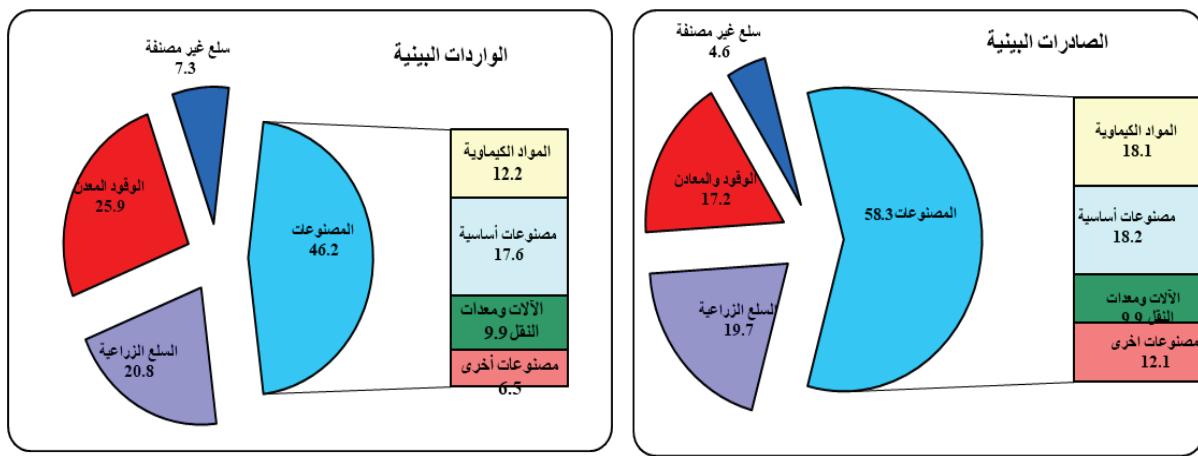

على صعيد تطورات الدين الخارجي وأعباءه على الدول العربية، فقد شهد إجمالي الدين الخارجي للدول العربية المقترضة والمتوفرة عنها بيانات كمجموعه ارتفاعاً بلغت نسبته حوالي 9.6 في المائة، ليصل إلى حوالي 290.1 مليار دولار بنتهاية عام 2018، مقارنة بحوالي 264.6 مليار دولار بنتهاية عام 2017. وتعزيز الزيادة في المديونية الخارجية إلى لجوء عدد من الدول المقترضة إلى الاقتراض الخارجي لتمويل العجز المالي المرتفع في ضوء الضغوطات المالية التي تواجهها. في المقابل، شهدت خدمة الدين العام الخارجي انخفاضاً ملحوظاً بلغت نسبته حوالي 19.9 في المائة لتصل إلى حوالي 21.6 مليار دولار بنتهاية عام 2018، مقارنة بحوالي 26.9 مليار دولار بنتهاية عام 2017. جاء هذا التراجع على خلفية انخفاض خدمة الدين الخارجي في ست دول عربية تمثل خدمة ديونيتها 94 في المائة من إجمالي خدمة الدين العام الخارجي للدول العربية المقترضة كمجموعه.

بالنسبة لمؤشرات المديونية الخارجية للدول العربية المقترضة كمجموعه، فقد ارتفعت نسبة الدين العام الخارجي إلى الناتج المحلي الإجمالي بحوالي 4.7 نقطة مئوية، لتصل إلى حوالي 35.5 في المائة بنتهاية عام 2018، مقارنة بحوالي 30.9 في المائة بنتهاية عام 2017. جاء ذلك كمحصلة لتسارع وتيرة نمو الدين العام الخارجي مقارنة بنمو الناتج المحلي الإجمالي بالأسعار الجارية على مستوى الدول العربية المقترضة كمجموعه. في ذات السياق، فقد شهد مؤشر خدمة الدين العام الخارجي إلى الصادرات من السلع والخدمات في الدول العربية المقترضة ارتفاعاً طفيفاً بلغ حوالي نقطة مئوية لتصل نسبته إلى 9.7 في المائة بنتهاية عام 2018، مقارنة بنسبة بلغت حوالي 13.7 بنتهاية عام 2017.

كمحصلة للتطورات المذكورة، ارتفعت قيمة التجارة العربية البينية خلال عام 2018 بمعدل بلغ حوالي 6.2 في المائة لتصل إلى نحو 109.6 مليار دولار، مقابل حوالي 103.2 مليار دولار مسجلة خلال عام 2017.

على صعيد الهيكل الساري للصادرات البينية العربية، حققت التجارة البينية للنفط الخام خلال عام 2018 مساهمة قدرها حوالي 6.0 في المائة من متوسط قيمة التجارة البينية العربية. وبخصوص مكونات التجارة البينية غير النفطية، استحوذت مجموعة السلع الصناعية على النصيب الأكبر، ثم مجموعة السلع الزراعية، الملحق (8/8) والشكل (2.8).

الشكل (2.8): الهيكل الساري للتجارة البينية العربية
*(2018)

(*) بيانات أولية.
المصدر: الملحق (8/8).

فيما يتعلق بتجارة الخدمات، شهد عام 2018 ارتفاع العجز المسجل بصفي ميزان تجارة الخدمات للدول العربية كمجموعة، جاء ذلك كنتيجة لزيادة المدفوعات من الخدمات بنسبة 4.9 في المائة. كما ارتفعت المتأصلة الخدمية للدول العربية كمجموعة بنحو 5.4 بالمائة خلال عام 2018 لتبلغ حوالي 212.9 مليار دولار مقابل حوالي 202 مليار دولار مسجلة عام 2017. يعزى ذلك للتحسن المتواصل الذي تشهده المتأصلة من بند السفر (السياحة) في بعض الدول العربية. هذا، في حين ارتفعت قيمة المدفوعات الخدمية للدول العربية كمجموعة بنسبة قدرها 4.9 في المائة لتبلغ حوالي 327 مليار دولار خلال عام 2018 مقارنة مع نحو 312.3 مليار دولار محققة بالعام المقابل، نتيجة لارتفاع المدفوعات الخاصة بكل من النقل والشحن والتأمين بسبب زيادة قيمة الواردات السلعية للدول العربية كمجموعة.

كمحصلة لتلك التطورات سالفه الذكر في كل من المتأصلة والمدفوعات الخدمية فقد ارتفع العجز المسجل بالميزان الخدمي للدول العربية كمجموعة خلال عام 2018، مسجلاً نسبة قدرها 3.9 في المائة ليصل إلى نحو 114.5 مليار دولار مقابل حوالي 110.2 مليار دولار تمثل عجز محقق خلال العام السابق.

موازين المدفوعات والدين العام الخارجي وأسعار الصرف

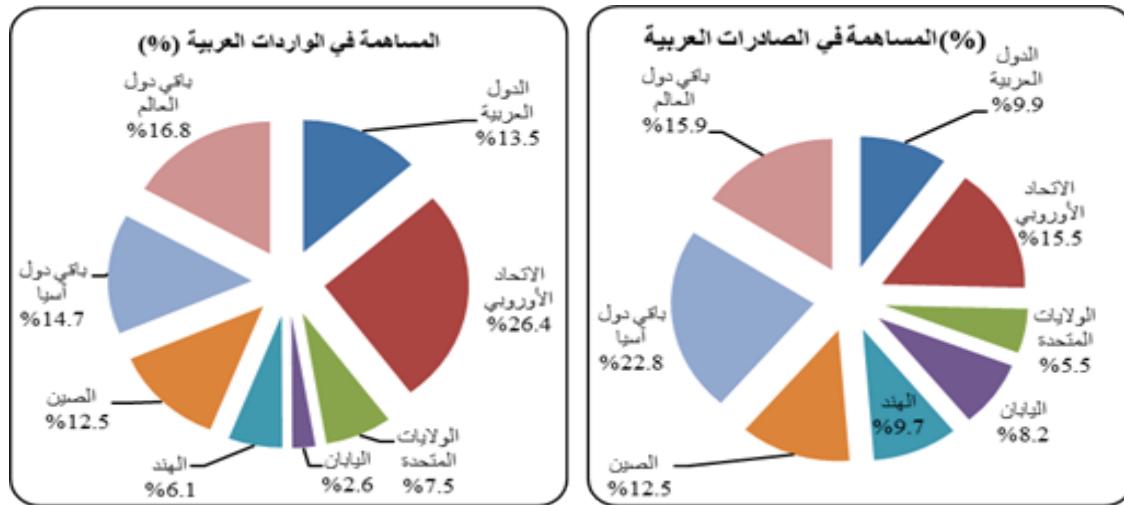

انعكست الزيادة الملحوظة التي شهدتها أسعار النفط العالمية على أداء موازين مدفوعات الدول العربية خلال عام 2018، الأمر الذي أدى إلى ارتفاع الفائض بالميزان التجاري لتلك الدول بنسبة قدرها 98.1 في المائة ليصل إلى نحو 318.4 مليار دولار. في المقابل، زاد العجز المسجل بكل من ميزان الخدمات والدخل، وصافي

فقد شهدت ارتفاعاً طفيفاً عام 2018 لتبلغ ما قيمته 824.6 مليار دولار مقارنة مع نحو 808.8 مليار دولار عام 2017، أي ارتفاع بلغت نسبته 1.9 في المائة.

بالنسبة لاتجاهات التجارة العربية خلال عام 2018 فقد أظهرت البيانات موجة من الصعود في حجم الصادرات العربية المتوجهة إلى مختلف الشركاء التجاريين، فقد احتلت الصادرات البينية العربية 9.9 في المائة، واحتلت الولايات المتحدة الأمريكية نسبة 5.5 بالمائة من إجمالي الصادرات العربية، والاتحاد الأوروبي نسبه 15.5 بالمائة، وحققت آسيا تحسناً ملحوظاً لتصل إلى 53.2 بالمائة في حين بلغت حصة باقي دول العالم نحو 15.9 في المائة.

وفيما يتعلق بالواردات العربية من الشركاء التجاريين الرئيسيين خلال عام 2018 فقد انخفضت الواردات من معظم الشركاء التجاريين بنسبة 2.0 بالمائة، وسجلت الواردات من الولايات المتحدة نسبة انخفاض بلغت 8.3 في المائة ومن الاتحاد الأوروبي بنسبة 1.8 في المائة، في المقابل ارتفعت الواردات من الدول العربية بنسبة 8.9 بالمائة وكذلك من الهند بمعدل 32.6 في المائة على الرغم من انخفاض نسبة الواردات من آسيا بنسبة 24.9 في المائة، الملحق (2/8) والشكل (1.8).

الشكل (1.8): اتجاهات التجارة العربية إلى أهم الشركاء التجاريين
*(2018)

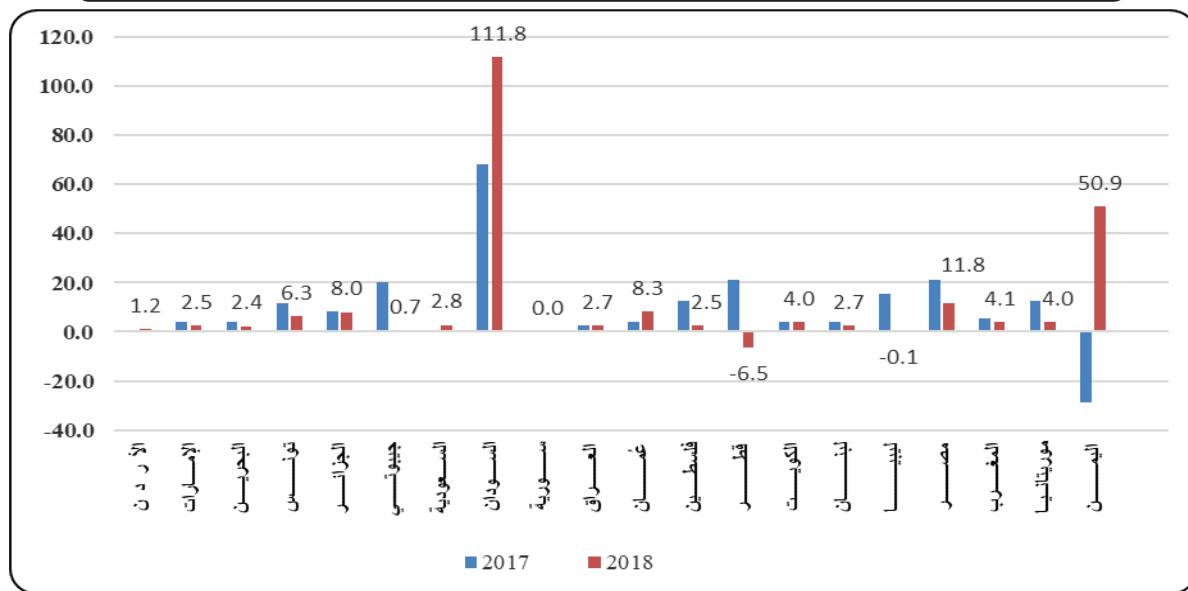

(*) بيانات أولية.
المصدر: الملحق (2/8).

بالنسبة للهيكل الساري للتجارة مازالت تستأثر فئة الوقود والمعادن على الحصة الأعلى في الصادرات الإجمالية العربية بلغت حوالي 63.4 في المائة عام 2018 في المائة مقارنة مع 59.2 في المائة عام 2017 مع انخفاض في نسب القطاعات الأخرى، بالرغم من الجهود المبذولة لتنوع الاقتصادات العربية. سجلت المنتجات الصناعية نسبة 28.8 في المائة وكذلك السلع الزراعية لتبلغ 7.1 في المائة من إجمالي الصادرات. وفيما يتعلق بالواردات فتشير البيانات أن المنتجات الزراعية حافظت على المرتبة الأولى في الواردات العربية ما نسبته 65.1 بالمائة بينما انخفضت السلع الزراعية انخفاضاً طفيفاً محققة نسبة 18.8 من إجمالي الواردات العربية خلال عام 2018.

أما بالنسبة للتجارة السلعية العربية البينية، فقد شهد عام 2018 تواصل التحسن في أداء التجارة العربية السلعية البينية، انعكاساً لاستمرار الزيادة التي تشهدها أسعار النفط العالمية لعام الثاني على التوالي. إضافة إلى ذلك، تحسنت حركة التجارة بين الدول العربية مع التحسن الذي تشهده الظروف الداخلية ببعض تلك الدول.

الشكل (1.7): معدلات نمو السيولة في الدول العربية
(2018–2017)

بيانات السعودية تشمل M3.
المصدر: الملحق (1/7).

أما على صعيد القطاع المصرفي، فقد تحسن أدائه خلال عام 2018 بالمقارنة مع العام الماضي. حيث أظهرت البيانات المجمعة للمصارف العربية تحسناً في كل من إجمالي الموجودات، وإجمالي الودائع، وإجمالي القروض والتسهيلات، والقواعد الرأسمالية المقومة بالدولار. وقد حافظت معدلات كفاية رأس المال للمصارف على مستوياتها المرتفعة نسبياً في غالبية الدول العربية في العام 2018، بالمقارنة مع الحدود الدنيا المطلوبة وفقاً لقرارات لجنة بازل البالغة بـ 10.5 في المائة.

على صعيد أسواق المال العربية، جاء أداء الأسواق المالية العربية خلال عام 2018 إيجابياً بشكل عام، وذلك بالمقارنة مع عام 2017. فقد ارتفعت القيمة السوقية للبورصات العربية المدرجة بقاعدة البيانات الخاصة بصناديق النقد العربي بنحو 69.6 مليار دولار. فيما استمرت قيمة التداولات بالتراجع للسنة الرابعة على التوالي، لتسجل تراجعاً بنحو 3.5 في المائة.

على صعيد الاستثمار الأجنبي في البورصات العربية، ارتفعت قيم التعاملات الخاصة بالمستثمرين الأجانب، بالمقارنة مع عام 2017، وسجلت هذه التعاملات صافي تدفق موجب مقارنة مع صافي تدفق سالب العام الماضي. هذا وقد حفل عام 2018 بمواصلة السلطات الإشرافية والرقابية في الدول العربية جهودها للارتقاء وتطوير البنية التشريعية والتنظيمية للقطاع المصرفي وأسواق المال، من خلال مواكبة التطورات والالتزام بالمعايير والمبادئ الدولية، والعمل على تطوير وتحديث التعليمات والممارسات المنسجمة مع هذه المعايير والمعززة للفصاحة والشفافية.

التجارة الخارجية (الإجمالية والبيانية)

بلغت التجارة السلعية الإجمالية العربية خلال عام 2018 ما قيمته 1920 مليار دولار مقارنة مع 1765 مليار دولار عام 2017 محققة نسبة ارتفاع بلغت حوالي 8.8 في المائة بسبب ارتفاع قيمة الصادرات السلعية العربية الإجمالية إلى 1095.4 مليار دولار عام 2018 مقارنة مع 956.3 مليار دولار عام 2017 أي بنسبة ارتفاع بلغت حوالي 14.5 في المائة مما كانت عليه عام 2017. أما أداء الواردات السلعية الإجمالية العربية،

بالنسبة لـإجمالي الدين العام القائم (الداخلي والخارجي) في الدول العربية المتوفر بيانات بشأنها، فقد ارتفع بحوالي 6.3 في المائة ليصل إلى حوالي 707.8 مليار دولار في عام 2018، مقارنة بحوالي 665.9 مليار دولار في عام 2017. بذلك ارتفعت نسبة الدين العام للدول العربية المفترضة إلى الناتج المحلي الإجمالي لتبلغ حوالي 128.7 في المائة في عام 2018 مقارنة بحوالي 110 في المائة في عام 2017.

التطورات النقدية والمصرفية وفي أسواق المال العربية

سجلت أوضاع السيولة المحلية تباطؤ على مستوى الدول العربية كمجموعة خلال عام 2018 بفعل بعض العوامل التي أسفرت عن تراجع صافي الائتمان المحلي وصافي الأصول الأجنبية، حيث سجل معدل نمو السيولة على مستوى الدول العربية تراجعاً خلال عام 2018 ليصل إلى ما يقرب من 6.0 في المائة مقابل 8.7 في المائة مسجلة عام 2017.

في ظل ارتباط عدد كبير من العملات العربية بالدولار الأمريكي واتجاه مجلس الاحتياطي الفيدرالي الأمريكي بإجراء أربع جولات لرفع أسعار الفائدة على الدولار في 2018، ارتفعت أسعار الفائدة الرسمية في الدول العربية التي تتبنى نظماً ثابتة لأسعار الصرف ومعظمها من البلدان العربية المصدرة للنفط للحفاظ على استقرار سعر الصرف. فيما تباينت توجهات أسعار الفائدة في بعض الدول العربية المستوردة للنفط التي تتبنى نظماً أكثر مرنة لأسعار الصرف. بهدف احتواء جانبٍ من الضغوط التضخمية ودعم العملات المحلية.

من جانبٍ آخر، واصلت بعض المصارف المركزية العربية في الدول العربية المستوردة للنفط سعيها إلى تعزيز مرنة أسعار الصرف بما يعكس حرصها على زيادة قدرة نظم الصرف على امتصاص الصدمات الخارجية، وذلك في ظل نجاح الإصلاحات الاقتصادية المطبقة في بعضها في تعزيز وضعية استقرار الاقتصاد الكلي. مكنت هذه التحولات في نظم الصرف عدداً من الدول العربية من المضي قدماً في تنفيذ سياساتها الرامية إلى استهداف التضخم وأعلن بعضها لأول مرة عن مستهدفات كمية لمعدلات التضخم. في هذا الإطار، واصلت هذه المصارف سعيها إلى بناء إطار لتوقعات التضخم على المدى القصير والمتوسط، ومتابعتها بشكل مستمر للمؤشرات ذات العلاقة بالأسعار كهدف وسيط للسياسة النقدية، واستخدامها لسعر الفائدة في السوق النقدية كهدف تشغيلي للسياسة النقدية.

ركزت الإصلاحات المتبناة في الدول العربية على صعيد السياسة النقدية على زيادة مستويات كفاءة السياسة النقدية في تحقيق مستهدفاتها من خلال تطوير بعض أدوات السياسة النقدية القائمة، واستحداث أدوات نقدية جديدة لضمان إدارة السيولة وزيادة مستويات كفاءة الأطر التشغيلية للسياسة النقدية. كما ركزت تدخلات المصارف المركزية على تمكين القطاع المصرفي من مواجهة التحديات التي ترتبط بمحودية الموارد من العملات الأجنبية، وكذلك على دعم النمو الاقتصادي وزيادة مستويات الشمول المالي والاستفادة من التقنيات المالية الحديثة في زيادة مستويات كفاءة الخدمات المالية، الملحق (1/7) والشكل (1.7).

التطورات المالية

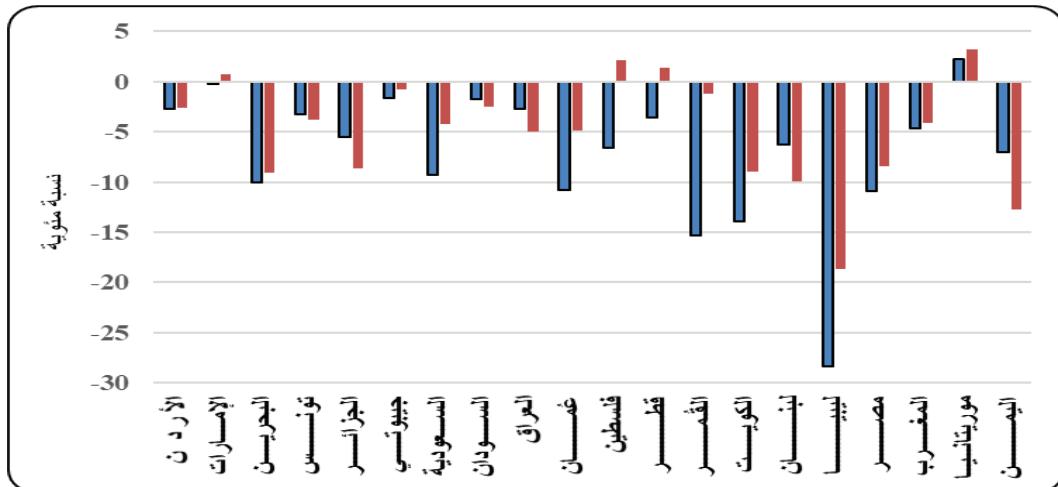

ساهمت التطورات الإيجابية في أسواق النفط العالمية، من حيث مواصلة أسعار النفط اتجاهها التصاعدي، في تعزيز الوضع المالي في الدول العربية المنتجة والمصدرة الرئيسة للنفط التي شهدت زيادات كبيرة في حصيلة الإيرادات البترولية خلال عام 2018. وأولت الدول العربية المنتجة والمصدرة الرئيسة للنفط اهتماماً خاصاً لأمر تطوير التحصيل الضريبي، في إطار الجهد لتنويع مصادر الإيرادات المالية بعيداً عن إيرادات النفط، حيث استكمل عدّ منها الأطر التشريعية والتنظيمية لتعزيز النظم الضريبية واستحداث أدوات ضريبية جديدة مثل ضريبة القيمة المضافة، الأمر الذي أدى إلى زيادة حصيلة الإيرادات الضريبية وتعزيز الوضع المالي خلال عام 2018.

وكان لعودة التعافي الاقتصادي في عدد من الدول العربية ذات الاقتصادات المتنوعة، وإن كان بوتيرة بطيئة، والإصلاحات الضريبية التي تم تبنيها، دوراً كبيراً في زيادة حصيلة الإيرادات الضريبية في هذه الدول. تعكس تطورات الإنفاق العام توجهها انتجهت معظم الدول العربية منذ عدة سنوات ماضية لاحتواء الإنفاق العام ضمن المسارات التي تضمن الاستدامة المالية وتعزز وضع الموازنة العامة في المديين المتوسط والبعيد، حيث سجلت معظم الدول العربية نمواً محدوداً في مستوى الإنفاق العام، خلال عام 2018، أخذًا بالاعتبار الموارد المالية المتاحة وعوامل التضخم ومتطلبات تلبية الحاجات التنموية والاجتماعية.

من جهة أخرى، أثرت الظروف الداخلية غير المواتية في عدد من الدول العربية بشكل سلبي على وضع الميزانيات العامة في ظل المتطلبات الاقتصادية والمالية الناشئة جراء تراجع الاستثمارات والأنشطة الاقتصادية المختلفة. في ضوء ما تقدم، ارتفع إجمالي الإيرادات العامة والمنعن في الدول العربية مجتمعة بنسبة بلغت حوالي 19 في المائة، ليصل إلى حوالي 786 مليار دولار في عام 2018، ما يمثل حوالي 29.6 في المائة من الناتج المحلي الإجمالي خلال العام المذكور، بينما ارتفع إجمالي الإنفاق العام للدول العربية كمجموعه بنسبة بلغت حوالي 8.6 في المائة ليصل إلى حوالي 899.7 مليار دولار، ما نسبته 33.9 في المائة من الناتج المحلي الإجمالي للدول العربية مجتمعة.

كمحصلة لذلك، تراجع عجز الموازنة العامة المجمعة للدول العربية ليصل إلى حوالي 113.7 مليار دولار في عام 2018، مقارنةً بعجز بلغ حوالي 168.3 مليار دولار في عام 2017. كما تراجع العجز كنسبة من الناتج المحلي الإجمالي، من حوالي 6.7 في المائة في عام 2017 إلى حوالي 4.3 في المائة في عام 2018، الملحق (10/6) والشكل (1.6).

الشكل (1.6): نسبة الفائض / العجز الكلي في الميزانيات العامة إلى الناتج المحلي الإجمالي في الدول العربية (2017-2018)

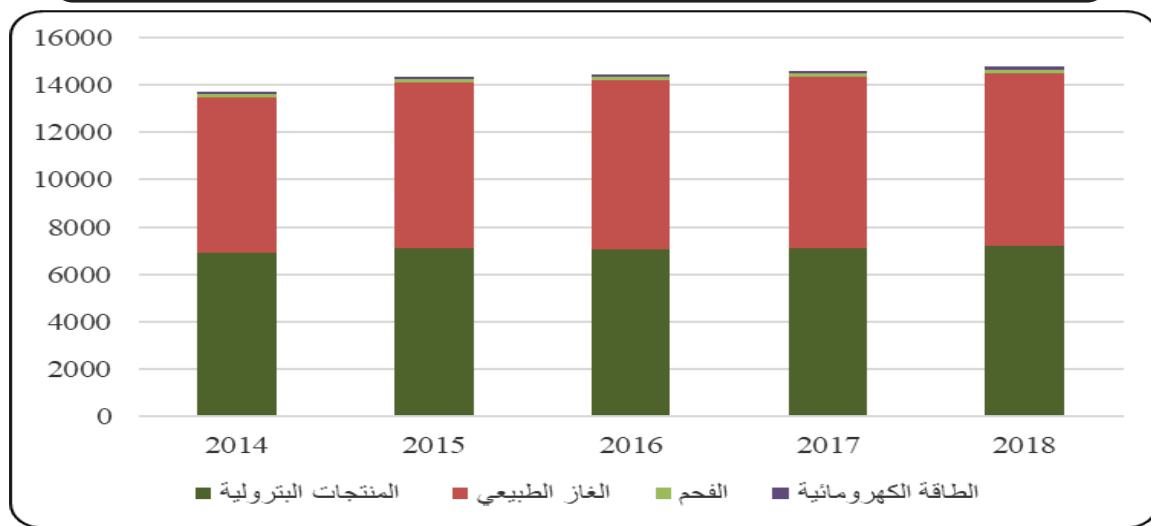

المصدر: الملحق (6/10).

كما سجل الطلب العالمي على النفط نمواً بنحو 1.5 مليون برميل/يوم، مقارنة بنمو بلغ 1.9 مليون برميل/يوم عام 2017، ليصل مستوى إلى 98.8 مليون برميل/يوم عام 2018. وقد استمرت وفرة الإمدادات بشكل ملحوظ وبخاصة من الولايات المتحدة الأمريكية وتحديداً من النفط الصخري، حيث ارتفع إجمالي الإمدادات النفطية العالمية بنحو 2.4 مليون برميل/يوم، ليبلغ 98.8 مليون برميل/يوم، وقد استقرت إمدادات دول أوبك من النفط الخام والنفوط غير التقليدية عند نفس مستوى العام السابق وهو 38.7 مليون برميل/يوم. في المقابل ارتفعت الإمدادات من الدول المنتجة من خارج أوبك بنحو 2.4 مليون برميل/يوم لتصل إلى 60.1 مليون برميل/يوم. ما ساهم في ارتفاع مخزونات النفط العالمية. كما تحققت خلال عام 2018 زيادة طفيفة في الاحتياطيات العالمية المؤكدة من النفط والغاز الطبيعي نسبتها 0.7 في المائة و1.9 في المائة على التوالي.

فيما يخص نشاط الاستكشاف في الدول العربية، فقد حققت خلال العام 7 اكتشافات نفطية و6 اكتشافات غازية، واستحوذت على أكثر من 48.6 في المائة من تقديرات الاحتياطي العالمي المؤكد من النفط ونحو 27 في المائة من احتياطيات الغاز الطبيعي العالمي. واستأثرت الدول العربية بنسبة 29.2 في المائة من إجمالي الإنتاج العالمي من النفط الخام، وشكلت حصتها من كميات الغاز الطبيعي المسوق نحو 15.5 في المائة من الإجمالي العالمي. كما ارتفع استهلاك الطاقة في الدول العربية عام 2018 بنحو 188 ألف برميل مكافئ نفط في اليوم (بـ مـ نـ يـ) أي بنسبة 1.3 في المائة ليصل إلى 14.7 مليون برميل مكافئ نفط يومياً. ظل النفط والغاز الطبيعي المصدرين الأساسيين اللذين تعتمد عليهما الدول العربية لتغطية احتياجاتها من الطاقة، حيث شكلت حصتها معاً 98.3 في المائة من إجمالي المصادر، مع دخول الطاقات المتتجدة بشكل ملحوظ في مزيج الوقود المستخدم في توليد الطاقة الكهربائية، الملحق (10/5) والشكل (5).

الشكل (1.5): الطلب على الطاقة في الدول العربية
(ألف برميل مكافئ نفط/يوم)
(2018–2014)

المصدر: منظمة الأوبك، تقرير الأمين العام (2017).

أما بالنسبة للمعدلات السنوية لأسعار نفوط التصدير الرئيسية في الدول العربية، فقد شهدت ارتفاعاً في مستوياتها خلال عام 2018 بنساب متفاوتة تراوحت ما بين 30.8 و35.9 في المائة، مما أدى إلى ارتفاع ملحوظ في قيمة الصادرات النفطية في الدول العربية.

العربية وعامل مؤثر في التنمية العربية وفي النمو الاقتصادي العالمي. تكتسب الصناعة الاستخراجية هذه الأهمية من نسبة الاحتياطيات العربية المستكشفة من النفط والغاز الطبيعي إلى إجمالي الاحتياطيات العالمية، إذ بلغت في العام 2018 حوالي 48.6 في المائة من النفط و27.0 المائة من الغاز الطبيعي. تسهم هذه الصناعة أيضاً في تزويد الأسواق المحلية والخارجية بالوقود بما يقدر بحوالي 25.3 مليون برميل نفط يومياً في العام 2018 وحوالي 600 مليار متر مكعب من الغاز الطبيعي المسوك سنوياً خلال عام 2018. ويتأثر الدور الكبير للصناعة الاستخراجية بكونها صناعة لموارد ناضبة غير متعددة.

تساهم الصناعات التحويلية في الدول العربية على حداثتها في تسريع التنمية وخلق فرص العمل وتنمية الموارد، حيث ساهمت الصناعات التحويلية بحوالي 10.4 في المائة من الناتج المحلي الإجمالي في العام 2018، وبذلك شكلت مساهمة القطاع الصناعي بشقيه الاستخراجي والتحويلي حوالي 37.2 في المائة من الناتج المحلي الإجمالي للدول العربية في عام 2018، ووفرت حوالي 26.7 في المائة من فرص العمل المباشرة.

شهدت الصناعات التحويلية نمواً مستمراً حيث بلغ الإنتاج العربي من الأسمدة في العام 2018 حوالي 252.8 مليون طن، ومن الحديد الصلب حوالي 22.7 مليون طن، وبلغ ناتج قطاع البناء والتشييد حوالي 6.5 في المائة من الناتج المحلي الإجمالي. وبلغ إنتاج الدول العربية من صناعة زيت الزيتون في العام 2018 حوالي 708.5 ألف طن، ومن صناعة السكر حوالي 3.6 مليون طن في عام 2017. كما يعرض التقرير واقع الصناعات السمكية، وصناعة السيارات التي بلغ إنتاج الدول العربية منها في العام 2018 حوالي 546 ألف سيارة، وتتناول صناعات تكرير النفط الذي بلغ في العام 2018 حوالي 9.1 مليون برميل يومياً، والصناعات البتروكيمائية والإيثيلين التي أصبحت المساهمة العربية فيها هامة على مستوى الإنتاج والتصدير، وأيضاً خصصت نافذة عن التكامل الصناعي العربي، ويختتم الفصل ببحث تناصصية الصناعات التحويلية العربية في الأسواق الخارجية.

النفط والطاقة

مرت أسواق النفط العالمية بموجة من التقلبات الحادة خلال عام 2018، وبخاصة خلال الربع الأخير منه. حيث شهدت انتعاشًا خلال الربع الأول، تزامناً مع قرار تمديد اتفاق خفض الإنتاج الذي توصلت إليه دول أوبك مع بعض منتجي النفط من خارجها (أوبك+) حتى نهاية عام 2018 من جهة، وانعكاساً لارتفاع الطلب العالمي على النفط بفضل تحسن أداء الاقتصاد العالمي الذي بدأ في العام السابق (2017) واكتسب مزيداً من القوة من ناحية أخرى. وقد استمر هذا الانتعاش خلال الربع الثاني من العام الذي شهد تعديل في اتفاق خفض الإنتاج، على خلفية تزايد المخاوف بشأن نقص إمدادات النفط العالمية. وخلال الربع الثالث، بدأت أسواق النفط في التأثر نسبياً بتصاعد التوترات الجيوسياسية وكذلك التوترات حول التجارة بين الولايات المتحدة الأمريكية والصين. بينما شهد الربع الرابع تزايد التوقعات بشأن انخفاض معدل نمو الطلب العالمي على النفط، وتجدد المخاوف بشأن ارتفاع إمدادات النفط العالمية، وقد ترتب على ذلك التوصل إلى تعديلات جديدة لاتفاق خفض الإنتاج بين دول (أوبك+)، بهدف المحافظة على توازن أسواق النفط، يأتي ذلك تزامناً مع حالة عدم اليقين المتعلقة بأفاق نمو الاقتصاد العالمي، والتي قد تتعكس بشكل سلبي على أسواق النفط العالمية خلال عام 2019.

بشكل عام، سجلت أسعار النفط العالمية ارتفاعاً ملحوظاً ليصل المعدل السنوي لسعر سلة خامات أوبك خلال عام 2018 إلى 69.8 دولار / برميل، وهو أعلى مستوى له منذ عام 2014، متأثرة بعوامل عديدة ومتداخلة منها ما له علاقة بأساسيات السوق وبعضها بعيد كل البعد عن ذلك كالعوامل الجيوسياسية ونشاط المضاربات وقوة أو ضعف الدولار الأمريكي.

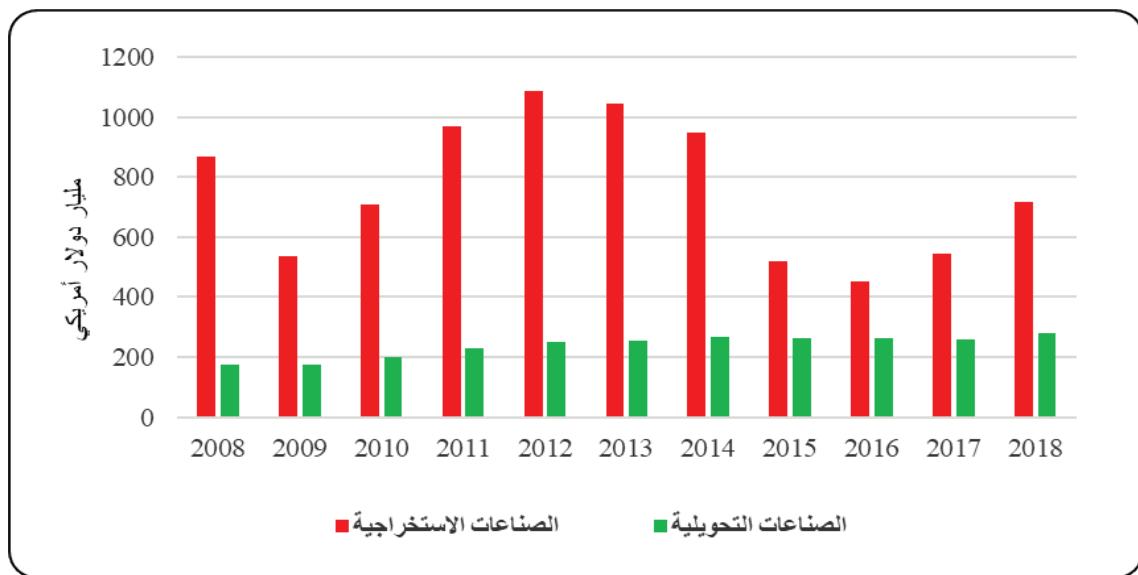

سجل الإنتاج النباتي نمواً بنسبة 3.2 في المائة في عام 2018، ويعود ذلك إلى تحسن مستوى الغلة لبعض المجموعات المحصولية المطرية وفي مقدمتها الحبوب، وكذلك للظروف المناخية المواتية، كما سجل الإنتاج الحيواني نمواً بلغ 3.6 في المائة، في حين ارتفع الإنتاج السمكي بنسبة بلغت 3.7 في المائة ليصل إلى حوالي 5.4 مليون طن. ويمثل هذا الإنتاج حوالي 67 في المائة من حجم المخزون السمكي.

وعلى صعيد تجارة المنتجات الزراعية، فقد بلغت قيمة العجز في الميزان التجاري الزراعي العربي في عام 2017 حوالي 62.4 مليار دولار أي بزيادة نسبتها 0.5 في المائة عن العام السابق. واستمر العجز الغذائي في بعض السلع الغذائية حيث بلغ إجماليه حوالي 33.6 مليار دولار عام 2017. كما أن نسبة الاكتفاء الذاتي لعدد من السلع الغذائية الأساسية مازالت منخفضة، من أهمها الزيوت والشحوم والحبوب والبقوليات والسكر.

الصناعة

حافظ قطاع الصناعة في الدول العربية على دوره المحوري في الاقتصاد العربي ذلك بفضل ارتفاع معدل نمو قطاع الصناعات الاستخراجية بما يعكس التحسن الملحوظ في أسعار النفط في الأسواق العالمية، حقق الناتج الصناعي في الدول العربية نمواً بلغ حوالي 24 في المائة، حيث ارتفع من 805 مليار دولار في عام 2017 إلى حوالي 999.6 مليار دولار في عام 2018. ساهم الناتج الصناعي للدول العربية بحوالي 37.2 في المائة من إجمالي الناتج المحلي الإجمالي خلال عام 2018، توزعت بين 26.8 في المائة، للصناعات الاستخراجية، و10.4 في المائة، للصناعات التحويلية، الملاحق (1/4) و(2/4) والشكل (1.4).

الشكل (1.4): الصناعات الاستخراجية والتحويلية في الدول العربية (2018-2008)

المصدر: الملاحق (1/4) و(2/4).

أضحت الصناعات الاستخراجية من النفط والغاز الطبيعي هي القاطرة التي تحرك الاقتصاد العربي في الدول المنتجة للنفط مباشرة وفي الدول غير المنتجة للنفط بصورة غير مباشرة، وهي كذلك المكون الأساسي في الناتج المحلي الإجمالي العربي، إذ ساهمت في العام 2018 بحوالي 26.8 في المائة من الناتج. وهي مدخل هام للعديد من الصناعات التحويلية وإنتاج الطاقة الكهربائية وحركة النقل، والمكون الوازن في الصادرات

في الدول العربية، إلا أن غالبية الدول العربية لازالت تواجه تحديات رئيسة تمثل في ارتفاع معدلات النمو السكاني، وال الحاجة إلى إصلاح التعليم وزيادة طاقته الاستيعابية وتحسين نوعيته لمقابلة الطلب المت pari على كل الدول العربية وخاصة في الدول العربية الأقل نمواً، بالإضافة إلى انتشار البطالة خاصة بين المتعلمين.

وقد بلغ متوسط دليل التنمية البشرية للدول العربية، وفقاً لدليل التنمية البشرية الذي أعده برنامج الأمم المتحدة الإنمائي لعام 2017، حوالي 0.699 (تنمية بشرية متوسطة: 0.645)، وهو ما يزيد عن نظيره على مستوى الدول النامية البالغ 0.681، إلا أنه يقل كثيراً عن مؤشر دول منظمة التعاون الاقتصادي والتنمية (OECD) البالغ 0.895⁽²⁾.

التطورات القطاعية

الزراعة

يعتبر القطاع الزراعي من القطاعات الاقتصادية الهامة في غالبية الدول العربية من حيث تلبيته لاحتياجات الاستهلاكية الغذائية، واستيعابه لحجم القوى العاملة، ومساهمته في تكوين الناتج المحلي الإجمالي، بالإضافة إلى توفيره السلع والمواد الأولية كدخلات للعديد من الصناعات التحويلية والغذائية.

انخفض الناتج الزراعي العربي بالأسعار الجارية إلى حوالي 119.9 مليار دولار في عام 2018، بتراجع بلغ حوالي 12.5 في المائة مقارنة بالمستويات المسجلة عام 2017. ويعزى معظم هذا التراجع في قيمة الناتج الزراعي خلال عام 2018 إلى انخفاض قيمة العملات الوطنية مقابل الدولار في عدد من البلدان العربية ذات الموارد الزراعية المهمة (السودان ومصر وتونس وسوريا). ففي السودان مثلاً، الذي شكلت قيمة ناتجه الزراعي في عام 2018 حوالي 5.5 في المائة من إجمالي الناتج الزراعي العربي، انخفضت قيمة العملة الوطنية بنسبة حوالي 394 في المائة مقابل الدولار. من جانب آخر تراوحت نسبة نمو الناتج الزراعي في الدول العربية ذات الموارد الزراعية مثل مصر والجزائر وتونس وسوريا والمغرب التي يمثل ناتجها الزراعي حوالي 61.9 في المائة من إجمالي الناتج الزراعي العربي، بينما بين 4.2 في المائة في سوريا و28.2 في المائة في مصر.

انخفضت مساهمة القطاع الزراعي في الناتج المحلي الإجمالي للدول العربية إلى حوالي 4.5 في المائة عام 2018، مقابل 5.5 في المائة عام 2017. كما تراجع نصيب الفرد من الناتج الزراعي بنحو 17.3 في المائة ليصل إلى 302 دولاراً عام 2018 مقارنة مع 366 دولاراً عام 2017. فيما بلغ نصيب العامل الزراعي في عام 2017 من الناتج الزراعي حوالي 6,167 دولاراً.

تمثل مساحة الأراضي المزروعة فعلياً في الدول العربية عام 2017 حوالي 32.8 في المائة من مساحة الأرضي الصالحة للزراعة والبالغة 220 مليون هكتار، وتمثل مساحة الأرضي المزروعة مطرياً حوالي 40 في المائة من المساحة التي تزرع بالمحاصيل الموسمية. ويقدر حجم المياه المنتاج سنوياً بحوالي 258 مليار م³، منها 209 مليارات م³ مياه سطحية و49 مليارات م³ مياه جوفية ومحلاة.

تشهد أعداد القوى العاملة بالزراعة تناقصاً سنوياً إذ انخفضت من حوالي 27.1 مليون عامل في عام 2010 إلى حوالي 24.1 مليون مشغل في عام 2017 أي بنسبة تراجع بلغت 1.7 في المائة سنوياً. ويعود سبب ذلك إلى ظاهرة هجرة العمالة الزراعية إلى القطاعات الأخرى لتضاؤل فرص العمل المُجدية في النشاط الزراعي.

⁽¹⁾ برنامج الأمم المتحدة الإنمائي (2018)، تقرير التنمية البشرية (2018).

الطلب المحلي، وارتفاع أسعار بعض السلع الأساسية والوقود عقب تطبيق برامج إصلاح للسياسات المالية، فضلاً عن تأثر عددٍ من هذه الدول بالظروف الداخلية التي تمر بها، تراجعت تلك الضغوط في بقية الدول العربية، حيث انخفض متوسط معدل التضخم في الدول العربية كمجموعة من حوالي 8.1 في المائة عام 2017 إلى حوالي 7.9 في المائة عام 2018.

بلغ معدل نمو الناتج المحلي الإجمالي بالأسعار الثابتة في الدول العربية كمجموعة حوالي 2.6 في المائة عام 2018، مقابل معدل نمو بلغ نحو 1.0 في المائة عام 2017. وسجلت مجموعة الدول العربية المصدرة الرئيسية للنفط معدل نمو بلغ نحو 2.5 في المائة عام 2018، مقابل معدل قدر بحوالي 0.2 في المائة عام 2017، وسجلت مجموعة دول مجلس التعاون لدول الخليج العربية في عام 2018 نمواً بلغ نحو 2.3 في المائة، مقابل انكماش قدر بحوالي 0.3 في المائة عام 2017، أما في مجموعة الدول الأخرى، فقد ارتفع متوسط معدل النمو من حوالي 2.8 في المائة عام 2017 إلى حوالي 2.9 في المائة عام 2018.

فيما يتعلق بالهيكل القطاعي للناتج المحلي الإجمالي، سجلت قطاعات الإنتاج السمعي زيادة في حصتها في الناتج على حساب قطاعات الخدمات، خاصة قطاع الصناعات الاستخراجية التي زادت حصتها في الناتج من 22.0 في المائة عام 2017 إلى حوالي 26.8 في المائة عام 2018 بفضل النمو المرتفع الذي سجله هذا القطاع والذي بلغ نحو 31.9 في المائة عام 2018. وفي جانب توزيع الناتج حسب بنود الإنفاق، فقد تراجعت حصة كلٍ من الاستهلاك النهائي، بشقيه العائلي والحكومي، وكذلك الاستثمار، مقابل ارتفاع حصة فجوة الموارد بفضل ارتفاع حصة صادرات السلع والخدمات مدفوعة بمعدل نمو بلغ نحو 16.6 في المائة عام 2018.

بالنسبة لمؤشرات الفقر، تشير أحدث البيانات المتوفرة إلى أن نسب الفقر حسب خطوط الفقر الوطنية تتراوح بين 4.8 في المائة في المغرب، و48.6 في المائة في اليمن وذلك باستثناء دول مجلس التعاون لدول الخليج العربية، التي تعتبر ضمن المجموعة الأقل فقراً في الدول العربية. تزيد نسبة الفقر عن 40 في المائة من السكان في كل من الْفُّلُوْنِ والسودان والصومال واليمن. وباعتبار دليل الفقر متعدد الأبعاد، فإن الظروف المعيشية في هذه الدول لها وزن أكبر في قيمة الدليل، بينما تساهم الجوانب المتعلقة بالصحة والتعليم بوزن أكبر في قيمة الدليل لدى الدول العربية ذات الدخل المتوسط والمرتفع.

وبالإضافة إلى تواضع مستوى الخدمات الاجتماعية كالصحة والتعليم والإسكان، يعزى سبب انتشار الفقر متعدد الأبعاد في الدول العربية أيضاً إلى تواصل الظروف التي تشهدها بعض الدول العربية وتزايد عدد اللاجئين والمهاجرين النازحين من أوطانهم الأصلية. وفي حين أن درجة التفاوت في توزيع الدخل والإإنفاق تعتبر منخفضة في الدول العربية بالمقارنة مع بقية دول العالم، حيث يتراوح معامل جيني بين 27.6 في الجزائر و45 في الْفُّلُوْنِ، إلا أن حصة شريحة أغنى مقابل حصة شريحة أفق 20 في المائة من السكان تعتبر مرتفعة، حيث تتجاوز 10 أضعاف في كل من الْفُّلُوْنِ وجيبوتي، وتقع النسبة بين 5 و10 في بقية الدول العربية، ما عدا مصر والعراق والجزائر حيث تقل تلك النسبة عن 5 أضعاف.

التطورات الاجتماعية

حققت الدول العربية، خلال الفترة (2008 – 2018)، تقدماً ملحوظاً في مجالات مكافحة الفقر، وتعظيم التعليم والرعاية الصحية، وتمكين المرأة. ويوضح ذلك من التطور الإيجابي المنتظم لعدد من المؤشرات الاجتماعية من بينها معدلات الإللام بالقراءة والكتابة بين البالغين والشباب، ومعدلات الالتحاق بمراحل التعليم المختلفة، وارتفاع نسبة مشاركة المرأة في سوق العمل، ومتوسط العمر المتوقع عند الولادة، ونسبة السكان الذين يحصلون على مياه الشرب النقية والصرف الصحي الملائم.

يأتي هذا التقدم تنوياً لتوسيع نطاق المستفيدين من الخدمات الاجتماعية الذي حققه الدول العربية منذ سبعينيات القرن الماضي. لكنه بالرغم من التطورات الإيجابية التي طرأت على عدد من المؤشرات الاجتماعية

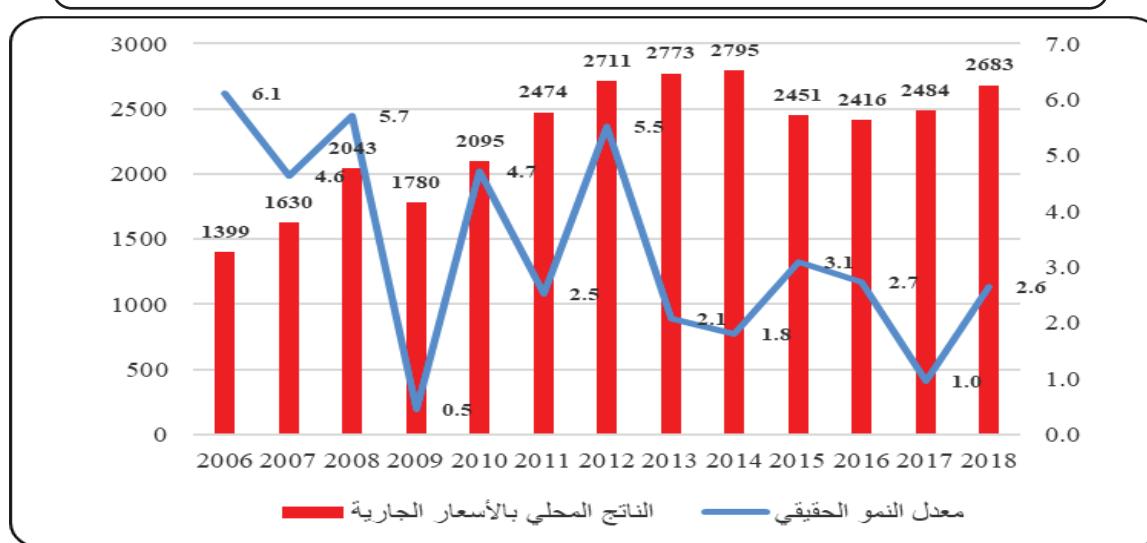

أداء الاقتصادات العربية

التطورات الاقتصادية

سجل أداء الاقتصادات العربية كمجموعة تحسناً ملمساً خلال عام 2018، وارتفعت وتيرة النمو في أكثر من نصف تلك الدول مدفوعةً بنتائج تلاقي ظروف خارجية وداخلية كانت إيجابية في المجمل. فعلى مستوى التطورات الدولية، ساهم ظهور بوادر تعافي الاقتصاد العالمي خلال النصف الأول من عام 2018 في دعم الطلب على النفط وزيادة أسعاره في الأسواق الدولية، وعلى السلع والخدمات المصدرة من الدول العربية مما كان له أثراً إيجابياً على حجم النشاط الاقتصادي في تلك الدول. في المقابل تأثر أداء الاقتصادات العربية في النصف الثاني من نفس السنة، نتيجة ظهور انكasaة في أداء الاقتصاد العالمي عقب تفاقم التوترات والخلافات التجارية وزيادة مستوى الالياقين في الأسواق المالية الدولية بعد ارتفاع أسعار الفائدة إثر إنهاء العمل بسياسة التسهيل النقدي خاصة في الولايات المتحدة. وقد عقدت هذه التطورات وضعية المديونية لدى عدد من الدول النامية والعربية، وأثرت على تدفق الاستثمارات الأجنبية ورؤوس الأموال نتيجة لارتفاع جاذبية الأصول المقومة بالدولار.

على مستوى العوامل الداخلية، فرغم تواصل التداعيات الناتجة عن الأوضاع التي تمر بها بعض الدول العربية، فقد حققت عدد من الدول العربية خلال عام 2018 معدلات نمو أعلى من تلك المسجلة في عام 2017، بفضل تحسن عائدات صادرات النفط، وظهور الآثار الإيجابية لتنفيذ عدد من برامج الإصلاح الاقتصادي واتباع سياسات مالية أكثر حصافة. وسجل الناتج المحلي الإجمالي بالأسعار الجارية في الدول العربية ككل نمواً بلغ نحو 8.0 في المائة عام 2018 بالمقارنة مع 2.8 في المائة عام 2017، الملحق (1/2) والشكل (1.2).

الشكل (1.2): الناتج المحلي الإجمالي ومعدل النمو الحقيقي (2018-2006)

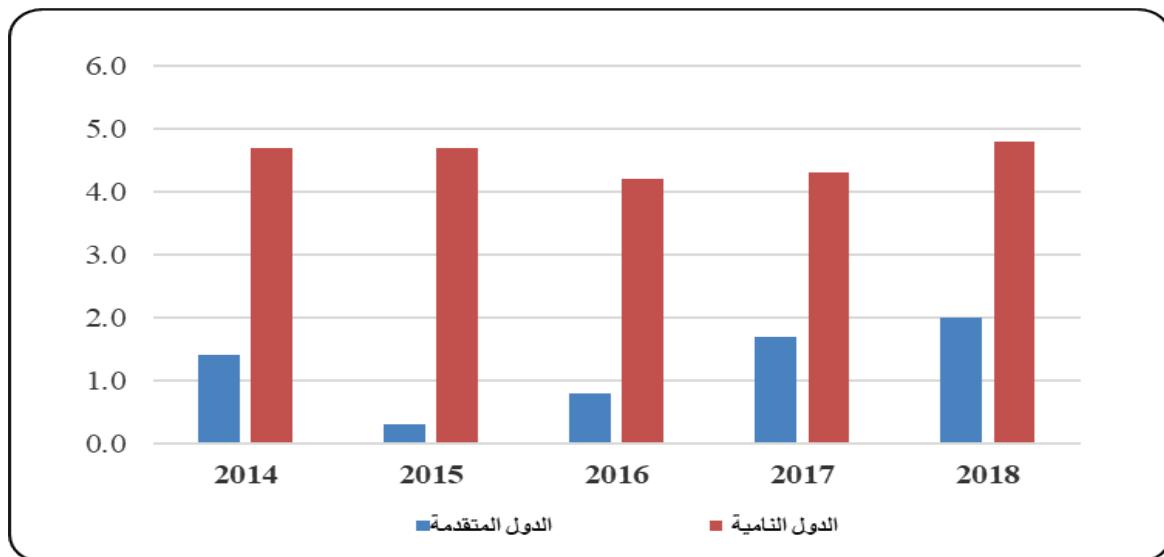

المصدر: الملحق (2.1)، تقديرات مُعدى التقرير، بناءً على المصادر الوطنية والدولية، تقديرات الناتج المحلي الإجمالي بالأسعار الجارية، مجمعة بعد توحيد سنة الأساس، وتحويلها إلى تقديرات بالدولار الأمريكي بأسعار صرف العملات المحلية لسنة الأساس 2010.

قدر متوسط نصيب الفرد من الناتج المحلي الإجمالي بالأسعار الجارية في الدول العربية كمجموعة بحوالي 6651 دولار عام 2018 مسجلاً بذلك ارتفاعاً بلغ نحو 5.6 في المائة بالمقارنة مع عام 2017. وفي حين شهد عام 2018 زيادة في الضغوط التضخمية في عددٍ من هذه الدول العربية نتيجة لعدة عوامل منها الزيادة في

على مستوى الاقتصادات المتقدمة، فقد تراجع معدل نموها المسجل خلال عام 2018 ليبلغ نحو 2.2 في المائة مقابل 2.4 في المائة عام 2017. بالنسبة للدول النامية واقتصادات السوق الناشئة، ورغم تحقيق دول المجموعة معدل نمو مرتفع عام 2018 مقارنة بالدول المتقدمة بلغ 4.5 في المائة، إلا أنه يعد أقل من المستوى المسجل عام 2017 البالغ 4.8 في المائة.

رغم تباطؤ النشاط الاقتصادي العالمي، إلا أن معدل التضخم العالمي قد سجل ارتفاعاً حيث ساهمت عدة عوامل في تزايد الضغوط التضخمية في عدد من الدول المتقدمة والنامية، من أهمها ارتفاع أسعار النفط والمواد الأولية، وانخفاض قيمة عملات عدد من البلدان النامية على ضوء الأوضاع الاقتصادية التي شهدتها خلال العام وتدفق رؤوس الأموال إلى خارج هذه البلدان في ظل ارتفاع أسعار الفائدة على بعض العملات الرئيسية، الملحق (2/1) والشكل (2.1).

الشكل (2.1): معدلات التضخم في الدول المتقدمة والدول النامية واقتصادات السوق الناشئة الأخرى (2018–2014)

المصدر: الملحق (2/1).

من جانب آخر، تراجعت معدلات نمو التجارة الدولية عام 2018، حيث سجلت التجارة الدولية معدل نمو بلغ 3.8 في المائة عام 2018 مقابل 5.4 في المائة عام 2017 في ظل ظروف عدم اليقين بشأن السياسات التجارية وتاثيراتها السلبية على أنشطة الاستثمار والتصنيع ومناخ الأعمال وثقة المستثمرين.

فيما يتعلق بالمديونية الخارجية، فقد ساهمت التطورات الدولية في ارتفاع إجمالي الدين العام الخارجي القائم في ذمة الدول النامية واقتصادات السوق الناشئة ليبلغ نحو 10057.9 مليار دولار عام 2018 مقابل 9607.4 مليار دولار عام 2017. على صعيد أسعار صرف العملات الرئيسية، فقد شهدت عدة تطورات خلال عام 2018 جعلت الدولار الأمريكي يحقق خسائر مقابل بعض العملات الرئيسية الأخرى مقابل تحقيق مكاسب خلال الأعوام السابقة، حيث انخفض سعر صرف الدولار مقابل الجنيه الاسترليني واليورو، وشهد ثباتاً أمامين الياباني.

التقرير الاقتصادي العربي الموحد لعام 2019

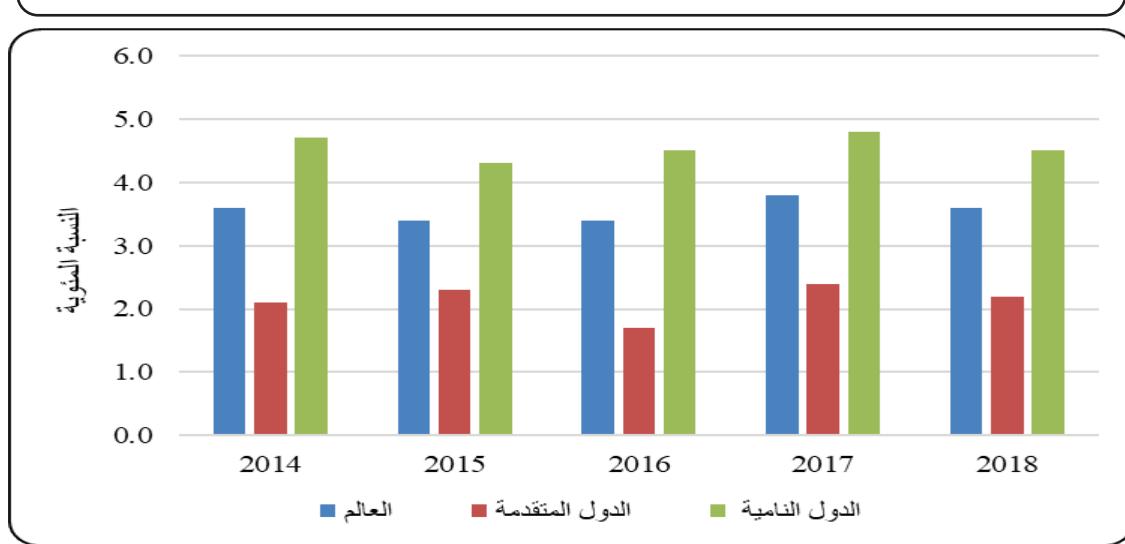

نظرة عامة

يتناول التقرير الاقتصادي العربي الموحد لعام 2019 تحليلًّا للتطورات الاقتصادية التي شهدتها الدول العربية خلال عام 2018. ويبدأ باستعراض مختصر لأداء الاقتصاد العالمي، ثم ينتقل إلى الاقتصادات العربية حيث يتطرق إلى الأوضاع الاقتصادية والاجتماعية، ثم التطورات في قطاعات الزراعة والصناعة والنفط والطاقة. ويستعرض التقرير بعد ذلك تطورات المالية العامة والتغيرات النقدية والمصرفية وتغيرات أسواق المال العربية، ثم ينتقل إلى التجارة الخارجية والتجارة البينية وموازنات المدفوعات والدين العام الخارجي وأسعار الصرف. وكمحور لهذا العام يتناول التقرير موضوع "الشمول المالي في الدول العربية: الواقع والآفاق"، وبعد ذلك يقدم التقرير عرضاً للعون الإنمائي العربي والدولي. وفي إطار إبراز أهمية التعاون الاقتصادي العربي المشترك، يتناول تقرير هذا العام أيضاً فصلاً عن "التعاون العربي في مجال تجارة الخدمات"، ويختتم التقرير بفصل يستعرض أوضاع الاقتصاد الفلسطيني.

أداء الاقتصاد العالمي

بدأ الاقتصاد العالمي عام 2018 بدايةً يكسوها التفاؤل، في ظل التحسن الذي شهد النشاط الصناعي والتجاري العالمي عام 2017، ولكن ما لبث أن تراجع الانتعاش المُتحقق نظراً لعدم اليقين بشأن السياسة التجارية، في ظل اتجاه القوتين الاقتصاديتين العالميتين –الولايات المتحدة الأمريكية والصين- إلى رفع الرسوم الجمركية على تجاراتهما البينية تصاعدت على إثرها وتيرة الحماية التجارية. كما ساهم في تباطؤ النشاط الاقتصادي العالمي التأثير الانكماشي الناتج عن عودة المسارات التقليدية للسياسة النقدية في بعض الاقتصادات الكبرى في عام 2018. بناءً عليه، انخفض معدل نمو الاقتصاد العالمي إلى 3.6 في المائة عام 2018 مقابل 3.8 في المائة عام 2017، الملحق (1/1) والشكل (1.1).

الشكل (1.1): معدلات نمو الناتج المحلي الإجمالي في العالم، والدول المتقدمة، والدول النامية واقتصادات السوق الناشئة الأخرى (2014-2018)

تقديم

يتناول العدد التاسع والثلاثون من التقرير الاقتصادي العربي الموحد الصادر عام 2019، وكعادته منذ صدور العدد الأول منه عام 1980، التطورات الاقتصادية في الدول العربية. ويعتبر التقرير الاقتصادي العربي الموحد نموذجاً للتعاون المثمر بين مؤسسات العمل العربي المشترك، حيث يشارك في إعداده كل من الأمانة العامة لجامعة الدول العربية والصندوق العربي للإنماء الاقتصادي والاجتماعي وصندوق النقد العربي ومنظمة الأقطار العربية المصدرة للبترول (الأوابك). وفي إطار هذا الجهد المشترك تقوم الجهات الأربع بإعداد الفصول المناظرة بها وفق التصور المتفق عليه لتقرير كل عام. وإضافة لذلك، يضطلع صندوق النقد العربي منذ بداية صدور التقرير في عام 1980 بمهام تحرير التقرير وإصداره. ويعرض التقرير في صورة أولية محدودة التداول للمناقشة وإبداء الدول الأعضاء ملاحظاتها، وذلك خلال اجتماعات مجلس محافظي المصارف المركزية ومؤسسات النقد العربية، والمجلس الاقتصادي والاجتماعي، في دورة سبتمبر من كل عام. وفي ضوء تلك الملاحظات يقوم صندوق النقد العربي، بالتنسيق مع المؤسسات المشاركة الأخرى، بتحرير الصيغة النهائية من التقرير وإصداره قبل نهاية العام.

وقد حرصت المؤسسات المشاركة في إعداده على أن يعكس التقرير بصورة موضوعية وعلمية أوضاع الاقتصادات العربية سواء من ناحية البيانات والمعلومات المتاحة، أو ما يتضمنه من منهجية في إعداده وتطويره. من ناحية البيانات والمعلومات، يعتمد القائمون على إعداد مواد التقرير على الحصول على البيانات والمعلومات من المصادر الوطنية الموثوقة، وإجراء التقديرات لما لا يستطيعون الحصول عليه، لإنجاز مادة التقرير في الوقت المحدد. وتبذل الجهات الرسمية في الدول العربية جهوداً مشكورة، في الاستجابة لطلبات استكمال الاستبيان الخاص بالتقرير. ونأمل أن يستمر هذا الاتجاه الإيجابي حتى يتمكن المسؤولون عن إعداد مواد التقرير من إعطاء صورة متكاملة لمختلف جوانب الاقتصادات العربية.

ومن ناحية منهجية إعداد التقرير وتطويره، تحرص المؤسسات المشاركة على أن تتضمن فصول التقرير تحليل التطورات الاقتصادية في الدول العربية باستخدام المؤشرات الرئيسية، وتصنيف الدول العربية حسب الموضوع قيد الدراسة لتسهيل عملية التحليل المقارن. في سبيل ذلك، تم احتساب البيانات المتعلقة بالتطورات الاقتصادية في الدول العربية بالدولار الأمريكي حسب أسعار صرف العملات الوطنية المستقاة من البيانات التي توفرها الدول لأغراض التقرير. وأخيراً، يتناول التقرير فصلاً خاصاً كل عام يشكل محوراً حول أحد المواضيع الاقتصادية الهامة بحيث تعكسه الفصول الأخرى كلما أمكن ذلك. ونرجو أن يكون هذا العدد من التقرير الاقتصادي العربي الموحد كالأعداد السابقة مرجعاً للمسؤولين وال محللين لأحوال الاقتصادات العربية.

نبذة تاريخية

كانت اللجنة السباعية لمحافظي المصارف المركزية ومؤسسات النقد العربية قد أوصت، عند اجتماعها في فبراير 1980، بأن يتولى صندوق النقد العربي مسؤولية إعداد تقرير سنوي موحد يتناول التطورات الاقتصادية في الوطن العربي بالتنسيق والتعاون مع الأمانة العامة لجامعة الدول العربية والمنظمات العربية المتخصصة، بغية الحد من تعدد الجهود التي تبذل من جانب كل من المنظمات في إعداد مثل هذا التقرير، ولتوفير قاعدة موحدة من البيانات والمعلومات عن إقتصادات الوطن العربي، بحيث يوفر التقرير الموحد خلفية تمكن السادة وزراء المال والاقتصاد العرب ومحافظي المصارف المركزية ومؤسسات النقد العربية خلال اجتماعاتهم الدورية، وغيرهم من المهتمين بالشؤون الاقتصادية العربية، من مناقشة أهم القضايا التي تواجه الوطن العربي، سواء فيما يتعلق بالعلاقات بين الأقطار العربية، أو فيما يتصل بالعلاقات بينها وبين دول العالم الخارجي.

صدر العدد الأول من التقرير الاقتصادي العربي الموحد في أغسطس 1980 وكان ذلك العدد ثمرة للتعاون بين صندوق النقد العربي والصندوق العربي للإنماء الاقتصادي والاجتماعي. ثم انضمت الأمانة العامة لجامعة الدول العربية لهذا الجهد المشترك منذ العدد الثاني، كما انضمت منظمة الأقطار العربية المصدرة للبترول منذ العدد الثالث

تأمل الجهات الأربع المشاركة في التقرير أن تكون قد وفقت في تحقيق الأهداف المرجوة منه، وعملت على توصيف الواقع الاقتصادي العربي بصورة علمية وموضوعية دقيقة وحيدة تامة، في إطار متماسك يعكس أهم أبعاد مسارات الاقتصادات العربية، وأن تكون بذلك قد قدمت ما يفيد ويعين المسؤولين والباحثين المهتمين بالشؤون الاقتصادية وتطورها في المنطقة العربية. كما تأمل أن يظل هذا الجهد موضع تطور مستمر، بفضل ما يثيره من تحليلات وتعليقات، وأن يصبح أحد محاور الارتياز في متابعة تطورات الاقتصاد العربي، وعملاً مساعداً في وضع السياسات الاقتصادية التي تحقق التنمية والاستقرار في أرجاء الوطن العربي، وتدعم مسيرة التعاون والعمل العربي المشترك.

وَاللَّهُ مَنْ وَرَاءِ الْقَصْدِ،،،

Abbas Ali Al-Nafie	Abdurrahman bin Abdallah Al-Hamidi	Abd Al-Latif Al-Hamad	Kamal Hassan Ali
