How to build an eco-system for RegTech/SupTech

November 2021

Challenges

How to overcome

Recommendations

Address **dysfunction**

The early eco-system

Regulators

Government

Financial
Institutions

RegTechs

Setting goals & deepening the pool

We defined RegTech

RegTech, short for Regulatory Technology. It's the application of technologies to improve the way organisations manage regulation and compliance across any regulated industry for businesses small and large and for Governments as well.

Taxonomy

Global language
Risk areas
Functional roles
Industries served
Technology used

Education

- What it is
- What it isn't
- The trust equation
- The taxonomy
- The opportunity
- Showcase programs
- Government a key stakeholder

Accelerate adoption

Collect and disseminate industry data

Encourage institutions by showcasing (in house and publicly)

Encouraging institutions to be internally aligned – this is not just tech, it's people!

Engage widely across institutions – including procurement and IT security

Address the challenges together

Partner with like-challenged institutions

RegTech and SupTech are born global and usually founded by industry practitioners

Time to value goal setting

2019

14 months

2021

8.4 months

Create a community

Safe discussion

Define it

Categorise it

Measure it

Who are we?

RegTech

Founded in 2017, non profit, independent, global industry association, member elected board with a clear mandate to accelerate adoption and create a global centre of excellence
